

Prospectus

June 30, 2020

- **Voya Prime Rate Trust**
- **25,000,000 Common Shares**
PPR

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Trust's annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Voya funds' website (www.individuals.voya.com/literature), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Trust electronically anytime by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by calling 1-800-992-0180 or by sending an e-mail request to Voyaim_literature@voya.com.

You may elect to receive all future reports in paper free of charge. If you received this document in the mail, please follow the instructions to elect to continue receiving paper copies of your shareholder reports. If you received this document through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. If you invest directly with us, you can call 1-800-992-0180 or send an email request to Voyaim_literature@voya.com to let the Trust know you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account if you invest through your financial intermediary or all funds held with the Voya funds complex if you invest directly with the funds.

This Prospectus sets forth concisely the information about Voya Prime Rate Trust ("Trust") that a prospective investor ought to know before investing. You should read it carefully before you invest and keep it for future reference. The Trust has filed with the U.S. Securities and Exchange Commission ("SEC") a Statement of Additional Information ("SAI") dated June 30, 2020 containing additional information about the Trust. The SAI is incorporated by reference in its entirety into this Prospectus. You may make shareholder inquiries or obtain a free copy of the SAI, annual shareholder report, and unaudited semi-annual shareholder report by contacting the Trust at 1-800-336-3436 or by writing to the Trust at 7337 East Doubletree Ranch Road, Suite 100, Scottsdale, Arizona 85258-2034. The Trust's SAI, annual shareholder report, and unaudited semi-annual shareholder report are also available free of charge on the Trust's website at www.voyainvestments.com. The Prospectus, SAI, and other information about the Trust are also available on the SEC's website (www.sec.gov). The table of contents for the SAI appears in the back of this Prospectus.

Common Shares of the Trust trade on the New York Stock Exchange ("NYSE") under the symbol PPR.

The Trust's investment objective is to provide investors with as high a level of current income as is consistent with the preservation of capital. Market fluctuations and general economic conditions can adversely affect the Trust. There is no guarantee that the Trust will achieve its investment objective. Investment in the Trust involves certain risks and special considerations, including risks associated with the Trust's use of leverage. **See "Risk Factors and Special Considerations" later in this Prospectus for a discussion of any factors that make an investment in the Trust speculative or high risk.**

Neither the SEC nor any state securities commission has approved or disapproved these securities, or determined that this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Voya Prime Rate Trust

The following synopsis is qualified in its entirety by reference to the more detailed information appearing elsewhere in this Prospectus.

DESCRIPTION OF THE TRUST

THE TRUST

The Trust is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended, and the rules, regulations, and applicable exemptive orders thereunder (“1940 Act”). It was organized as a Massachusetts business trust on December 2, 1987. As of June 5, 2020 the Trust’s net asset value (“NAV”) per Common Share was \$4.71.

NYSE LISTED

As of June 5, 2020 the Trust had 175,156,127.300 Common Shares outstanding, which are traded on the NYSE under the symbol PPR. At that date, the last reported sales price of a Common Share of the Trust was \$4.15.

INVESTMENT OBJECTIVE

To provide investors with as high a level of current income as is consistent with the preservation of capital. There is no assurance that the Trust will achieve its investment objective. The investment objective is fundamental and may not be changed without a majority vote of the shareholders of the Trust. See “Description of the Trust – Fundamental and Non-Fundamental Investment Policies of the Trust” later in this Prospectus.

ADVISER/SUB-ADVISER

Voya Investments, LLC (“Voya Investments” or “Adviser”), an Arizona limited liability company, serves as the investment adviser to the Trust. Voya Investments has overall responsibility for the management of the Trust. Voya Investments oversees all investment advisory and portfolio management services and assists in managing and supervising all aspects of the general day-to-day business activities and operations of the Trust, including custodial, transfer agency, dividend disbursing, accounting, auditing, compliance and related services. Voya Investments is registered with the SEC as an investment adviser.

The Adviser is an indirect, wholly-owned subsidiary of Voya Financial, Inc. Voya Financial, Inc. is a U.S.-based financial institution whose subsidiaries operate in the retirement, investment, and insurance industries.

The Adviser receives an annual fee, payable monthly, in an amount equal to 1.05% of the Trust’s average daily gross asset value, minus the sum of the Trust’s accrued and unpaid dividends on any outstanding preferred shares and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper, or notes issued by the Trust and the liquidation preference of any outstanding preferred shares) (“Managed Assets”). This definition includes assets acquired through the Trust’s use of leverage.

Voya Investment Management Co. LLC (“Voya IM” or “Sub-Adviser”) serves as sub-adviser to the Trust. Voya IM is an affiliate of the Adviser.

See “Investment Management and Other Service Providers - Sub-Adviser and Portfolio Managers” later in this Prospectus.

Voya Investments’ principal office is located at 7337 East Doubletree Ranch Road, Suite 100, Scottsdale, Arizona 85258. As of March 31, 2020, Voya Investments managed approximately \$73.8 billion in assets.

DISTRIBUTIONS

Income dividends on Common Shares accrue, are declared, and are paid monthly. Income dividends may be distributed in cash or reinvested in additional full and fractional shares of the Trust through the Trust’s Shareholder Reinvestment Program.

PRINCIPAL INVESTMENT STRATEGIES

The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets (plus borrowings for investment purposes) in U.S. dollar-denominated floating rate secured senior loans (“Senior Loans”). The Trust will provide shareholders with at least 60 days’ prior notice of any change in this investment policy. Under normal market conditions, the Trust invests at least 80% of its assets in Senior Loans made to corporations or other business entities organized under U.S. or Canadian law and that are domiciled in the United States and in U.S. territories and possessions or Canada. These Senior Loans are typically rated below investment-grade quality. Investments rated below investment-grade (or of similar quality if unrated) are commonly known as high-yielding, high risk investments or as “junk” investments.

The Senior Loans in which the Trust invests either hold the most senior position in the capital structure of the borrower, hold an equal ranking with other senior debt, or have characteristics (such as a senior position secured by liens on a borrower’s assets) that the Adviser or Sub-Adviser believes justify treatment as senior debt.

The Trust typically makes its investments in Senior Loans by purchasing a portion of the overall loan, *i.e.*, the Trust becomes one of a number of lenders investing in the loan. The Trust may also make its investments in Senior Loans through the use of derivative instruments such as participations, credit-linked notes, credit default swaps, and total return swaps as long as the reference obligation for any such instrument is a Senior Loan. Investments through the use of such derivative instruments involve counterparty risk, *i.e.*, the risk that the party from which such instrument is purchased will not perform as agreed. The Trust seeks to minimize such counterparty risk by purchasing such investments from large, well established and highly rated counterparties.

OTHER INVESTMENT STRATEGIES AND POLICIES

Loans in which the Trust invests typically have multiple interest rate reset periods at the same time, with each reset period applicable to a designated portfolio of the loan. The maximum duration of an interest rate reset on any loan in which the Trust may invest is one year. In order to achieve overall reset balance, the Trust will ordinarily maintain a dollar-weighted average time until the next interest rate adjustment on its loans of 90 days or less.

Normally at least 80% of the Trust's portfolio will be invested in Senior Loans with maturities of one to ten years. The maximum maturity on any loan in which the Trust may invest is ten years.

To seek to increase the yield on the Common Shares, the Trust may engage in lending its portfolio securities. Such lending will be fully secured by investment-grade collateral held by an independent agent.

The Trust may engage in executing repurchase and reverse repurchase agreements.

The Trust may invest up to 20% of its total assets, measured at the time of investment, in a combination of one or more of the following types of investments: loans to borrowers organized or located in countries outside the United States and outside U.S. territories and possessions or Canada; unsecured floating rate loans, notes, and other debt instruments; floating rate subordinated loans; tranches of floating rate asset-backed securities, including structured notes; corporate debt securities; and equity securities incidental to investment in loans. See "Investment Objective and Policies" later in this Prospectus.

The Trust may invest up to 15% of its total assets, measured at the time of investment, in investments denominated in Organization for Economic Co-operation and Development ("OECD") currencies (including the euro), other than the U.S. dollar. The Trust may engage in currency exchange transactions to seek to hedge, as closely as practicable, 100% of the economic impact to the Trust arising from foreign currency fluctuations. The Trust may not be entirely successful in implementing this hedging strategy, which may result in the Trust being adversely affected by foreign currency fluctuations.

LEVERAGE

To seek to increase the yield on the Common Shares, the Trust employs financial leverage by borrowing money and may also issue preferred shares. The timing and terms of leverage will be determined by the Adviser or Sub-Adviser under the supervision of the Trust's Board of Trustees ("Board"). See "Risk Factors and Special Considerations - Leverage" later in this Prospectus.

BORROWINGS

The Trust may borrow money in an amount permitted under the 1940 Act, including the rules, regulations, interpretations thereunder and any exemptive or other relief provided by the SEC. The Trust's obligations to holders of its debt are senior to its ability to pay dividends on, or repurchase, Common Shares and preferred shares, or to pay holders of Common Shares and preferred shares in the event of liquidation.

PREFERRED SHARES

The Trust is authorized to issue an unlimited number of shares of a class of preferred stock in one or more series ("Preferred Shares"). The Trust's obligations to holders of any outstanding Preferred Shares will be senior to its ability to pay dividends on, or repurchase, Common Shares, or to pay holders of Common Shares in the event of liquidation. Under the 1940 Act, the Trust may issue Preferred Shares so long as immediately after any issuance of Preferred Shares the value of the Trust's total assets (less all Trust liabilities and indebtedness that is not senior indebtedness) is at least twice the amount of the Trust's senior indebtedness plus the involuntary liquidation preference of all outstanding Preferred Shares.

The 1940 Act also requires that the holders of any Preferred Shares of the Trust, voting as a separate class, have the right to:

- elect at least two trustees at all times; and
- elect a majority of the trustees at any time when dividends on any series of Preferred Shares are unpaid for two full years.

As of June 5, 2020 the Trust had no Preferred Shares outstanding. The Trust may consider issuing Preferred Shares during the current fiscal year or in the future.

DIVERSIFICATION

The Trust maintains a diversified investment portfolio through an investment strategy which seeks to limit exposure to any one issuer or industry.

The Trust is diversified, as such term is defined in the 1940 Act. A diversified fund may not, as to 75% of its total assets, invest more than 5% of its total assets in any one issuer and may not purchase more than 10% of the outstanding voting securities of any one issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities, or other investment companies). The Trust will consider a borrower on a loan, including a loan participation, to be the issuer of that loan. In addition, with respect to a loan under which the Trust does not have privity with the borrower or would not have a direct cause of action against the borrower in the event of the failure of the borrower to make payment of scheduled principal or interest, the Trust will separately meet the foregoing requirements and consider each interpositioned bank (a lender from which the Trust acquires a loan) to be an issuer of the loan. This investment strategy is a fundamental policy that may not be changed without shareholder approval. With respect to no more than 25% of its total assets, the Trust may make investments that are not subject to the foregoing restrictions.

CONCENTRATION

In addition, a maximum of 25% of the Trust's total assets, measured at the time of investment, may be invested in any one industry. This investment strategy is also a fundamental policy that may not be changed without shareholder approval.

PLAN OF DISTRIBUTION

The Common Shares are offered by the Trust through the Trust's Shareholder Reinvestment Program. The Shareholder Reinvestment Program allows participating shareholders to reinvest all dividends in additional shares of the Trust, and also allows participants to purchase additional Common Shares through optional cash investments in amounts ranging from a minimum of \$100 to a maximum of \$100,000 per month. The Trust and Voya Investments Distributor, LLC ("Distributor") reserve the right to reject any purchase order. Please note that cash, traveler's checks, third-party checks, money orders, and checks drawn on non-U.S. banks (even if payment may be effected through a U.S. bank) generally will not be accepted. Common Shares may be issued by the Trust under the Shareholder Reinvestment Program only if the Trust's Common Shares are trading at a premium to NAV. If the Trust's Common Shares are trading at a discount to NAV, Common Shares purchased under the Shareholder Reinvestment Program will be purchased on the open market. See "Plan of Distribution" later in this Prospectus.

Shareholders may elect to participate in the Shareholder Reinvestment Program by telephoning the Trust or submitting a completed Participation Form to BNY Mellon Investment Servicing (US) Inc.

Common Shares also may be offered pursuant to privately negotiated transactions between the Trust or the Distributor and individual investors. Common Shares of the Trust issued in connection with privately negotiated transactions will be issued at the greater of: (i) NAV per Common Share of the Trust's Common Shares; or (ii) at a discount ranging from 0% to 5% of the average daily market price of the Trust's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. See "Plan of Distribution" later in this Prospectus.

PRINCIPAL RISKS

Credit Default Swaps: The Trust may enter into credit default swaps, either as a buyer or a seller of the swap. A buyer of a swap pays a fee to buy protection against the risk that a security will default. If no default occurs, the Trust will have paid the fee, but typically will recover nothing under the swap. A seller of a swap receives payment(s) in return for an obligation to pay the counterparty the full notional value of a security in the event of a default of the security issuer. As a seller of a swap, the Trust would effectively add leverage to its portfolio because, in addition to its total net assets, the Trust would be subject to investment exposure on the full notional value of the swap. Credit default swaps are particularly subject to counterparty, credit, valuation, liquidity and leveraging risks and the risk that the swap may not correlate with its underlying asset as expected. Certain standardized swaps are subject to mandatory central clearing. Central clearing is expected to reduce counterparty credit risk and increase liquidity; however, there is no assurance that central clearing will achieve that result, and in the meantime, central clearing and related

requirements expose the Trust to new kinds of costs and risks. In addition, credit default swaps expose the Trust to the risk of improper valuation.

Credit (Loans): Prices of the Trust's investments are likely to fall if the actual or perceived financial health of the borrowers on, or issuers of, such investments deteriorates, whether because of broad economic or issuer-specific reasons, or if the borrower or issuer is late (or defaults) in paying interest or principal. The Trust invests a substantial portion of its assets in below investment-grade Senior Loans and other below investment-grade assets. Below investment-grade loans commonly known as high-yielding, high risk investments or as "junk" investments involve a greater risk that borrowers may not make timely payment of the interest and principal due on their loans and are subject to greater levels of credit and liquidity risks. They also involve a greater risk that the value of such loans could decline significantly. If borrowers do not make timely payments of the interest due on their loans, the yield on the Common Shares will decrease. If borrowers do not make timely payment of the principal due on their loans, or if the value of such loans decreases, the net asset value will decrease.

Demand for Loans: An increase in demand for loans may benefit the Trust by providing increased liquidity for such loans and higher sales prices, but it may also adversely affect the rate of interest payable on such loans and the rights provided to the Trust under the terms of the applicable loan agreement, and may increase the price of loans in the secondary market. A decrease in the demand for loans may adversely affect the price of loans in the Trust's portfolio, which could cause the Trust's net asset value to decline and reduce the liquidity of the Trust's loan holdings.

Derivative Instruments: Derivative instruments are subject to a number of risks, including the risk of changes in the market price of the underlying securities, credit risk with respect to the counterparty, risk of loss due to changes in market interest rates and liquidity and volatility risk. The amounts required to purchase certain derivatives may be small relative to the magnitude of exposure assumed by the Trust. Therefore, the purchase of certain derivatives may have an economic leveraging effect on the Trust and exaggerate any increase or decrease in the net asset value. Derivatives may not perform as expected, so the Trust may not realize the intended benefits. When used for hedging purposes, the change in value of a derivative may not correlate as expected with the currency, security or other risk being hedged. When used as an alternative or substitute for direct cash investment, the return provided by the derivative may not provide the same return as direct cash investment. In addition, given their complexity, derivatives expose the Trust to the risk of improper valuation.

Impact of Shareholder Reinvestment Program and Privately Negotiated Transactions: The issuance of Common Shares through the Shareholder Reinvestment Program and/or through privately negotiated transactions may have an adverse effect on the secondary market for the Common Shares. The increase in the number of the outstanding Common Shares resulting

from issuances pursuant to the Shareholder Reinvestment Program or pursuant to privately negotiated transactions, and the discount to the market price at which such Common Shares may be issued, may put downward pressure on the market price for Common Shares. Common Shares will not be issued pursuant to the Shareholder Reinvestment Program at any time when Common Shares are trading at a price lower than the net asset value per Common Share.

Interest Rate: Changes in short-term market interest rates will directly affect the yield on Common Shares. If short-term market interest rates fall, the yield on Common Shares will also fall. To the extent that the interest rate spreads on loans in the Trust's portfolio experience a general decline, the yield on the Common Shares will fall and the value of the Trust's assets may decrease, which will cause the Trust's net asset value to decrease. Conversely, when short-term market interest rates rise, because of the lag between changes in such short-term rates and the resetting of the floating rates on assets in the Trust's portfolio, the impact of rising rates will be delayed to the extent of such lag. In the case of inverse securities, the interest rate paid by such securities generally will decrease when the market rate of interest to which the inverse security is indexed increases. With respect to investments in fixed rate instruments, a rise in market interest rates generally causes values of such instruments to fall. The values of fixed rate instruments with longer maturities or duration are more sensitive to changes in market interest rates.

As of the date of this Prospectus, market interest rates in the United States are at or near historic lows, which may increase the Trust's exposure to risks associated with rising market interest rates. Rising market interest rates could have unpredictable effects on the markets and may expose fixed-income and related markets to heightened volatility, which could reduce liquidity for certain investments, adversely affect values, and increase costs. If dealer capacity in fixed-income and related markets is insufficient for market conditions, it may further inhibit liquidity and increase volatility in the fixed-income and related markets. Further, recent and potential changes in government policy may affect interest rates.

Leverage: The use of leverage through borrowings or the issuance of Preferred Shares can adversely affect the yield on the Common Shares. To the extent that the Trust is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Common Shares will decrease. In addition, in the event of a general market decline in the value of assets such as those in which the Trust invests, the effect of that decline will be magnified in the Trust because of the additional assets purchased with the proceeds of the leverage. Further, because the fee paid to the Adviser will be calculated on the basis of Managed Assets, the fee will be higher when leverage is utilized, giving the Adviser an incentive to utilize leverage. The Trust is subject to certain restrictions imposed by lenders to the Trust and may be subject to certain restrictions imposed by guidelines of one or more rating agencies which may issue ratings for debt or the Preferred Shares issued by the Trust.

These restrictions are expected to impose asset coverage, fund composition requirements and limits on investment techniques, such as the use of financial derivative products that are more stringent than those imposed on the Trust by the 1940 Act. These restrictions could impede the manager from fully managing the Trust's portfolio in accordance with the Trust's investment objective and policies. As of June 5, 2020 the Trust had \$239.6 million in outstanding borrowings under one credit facility.

Limited Secondary Market for Loans: Because of the limited secondary market for loans, the Trust may be limited in its ability to sell loans in its portfolio in a timely fashion and/or at a favorable price. Furthermore, transactions in loans typically settle on a delayed basis and typically take longer than 7 days to settle. As a result the Trust may not receive the proceeds from a sale of a floating rate loan for a significant period of time which may affect the Trust's ability to repay debt, to pay dividends, to pay expenses, or to take advantage of new investment opportunities.

Market Discount: Shares of closed-end investment companies frequently trade at a discount from their net asset value. The possibility that Common Shares will trade at a discount from their net asset value is a risk separate and distinct from the risk that the net asset value may decrease.

Market Disruption and Geopolitical: The Trust is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Due to the increasing interdependence among global economies and markets, conditions in one country, market, or region might adversely impact markets, issuers and/or foreign exchange rates in other countries, including the U.S. War, terrorism, global health crises and pandemics, and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on U.S. and world economies and markets generally. For example, the recent COVID-19 pandemic has resulted, and may continue to result, in significant market volatility, exchange trading suspensions and closures, declines in global financial markets, higher default rates, and a substantial economic downturn in economies throughout the world. Natural and environmental disasters and systemic market dislocations are also highly disruptive to economies and markets. Those events as well as other changes in non-U.S. and domestic economic, social, and political conditions also could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, credit ratings, inflation, investor sentiment, and other factors affecting the value of the investments of the Trust and the Trust. Any of these occurrences could disrupt the operations of the Trust and of the Trust's service providers.

Non-U.S. and Non-Canadian Issuers: Investment in foreign borrowers involves special risks, including that foreign borrowers may be subject to: less rigorous regulatory, accounting, and reporting requirements than U.S. borrowers; differing legal systems and laws relating to creditors' rights; the potential inability to enforce legal judgments; economic adversity that

would result if the value of the borrower's non-U.S. dollar denominated revenues and assets were to fall because of fluctuations in currency values; and the potential for political, social, and economic adversity in the foreign borrower's country.

Temporary Defensive Positions: When market conditions make it advisable, the Trust may hold a portion of its assets in cash and short-term interest bearing instruments. Moreover, in periods when, in the opinion of the manager, a temporary defensive position is appropriate, up to 100% of the Trust's assets may be held in cash, short-term interest bearing instruments and/or any other securities the manager considers consistent with a temporary defensive position. The Trust may not achieve its investment objective when pursuing a temporary defensive position.

Valuation of Loans: The Trust values its assets daily. However, because the secondary market for floating rate loans is limited, it may be difficult to value loans, exposing the Trust to the risk that the price at which it sells loans will be less than the price at which they were valued when held by the Trust. Reliable market value quotations may not be readily available for some loans and determining the fair valuation of such loans may require more research than for securities that trade in a more active secondary market. In addition, elements of judgment may play a greater role in the valuation of loans than for more securities that trade in a more developed secondary market because there is less reliable, objective market value data available. If the Trust purchases a relatively large portion of a loan, the limitations of the secondary market may inhibit the Trust from selling a portion of the loan and reducing its exposure to a borrower when the manager deems it advisable to do so. Even if the Trust itself does not own a relatively large portion of a particular loan, the Trust, in combination with other similar accounts under management by the same portfolio managers, may own large portions of loans. The aggregate amount of holdings could create similar risks if and when the portfolio managers decide to sell those loans. These risks could include, for example, the risk that the sale of an initial portion of the loan could be at a price lower than the price at which the loan was valued by the Trust, the risk that the initial sale could adversely impact the price at which additional portions of the loan are sold, and the risk that the foregoing events could warrant a reduced valuation being assigned to the remaining portion of the loan still owned by the Trust.

WHAT YOU PAY TO INVEST - TRUST EXPENSES

The cost you pay to invest in the Trust includes the expenses incurred by the Trust. In accordance with SEC requirements, the table below shows the expenses of the Trust, including interest expense on borrowings, as a percentage of the average net assets of the Trust and not as a percentage of gross assets or Managed Assets. By showing expenses as a percentage of the average net assets, expenses are not expressed as a percentage of all of the assets that are invested for the Trust. The table below assumes that the Trust has borrowed an aggregate amount equal to 30% of its Managed Assets. For information about the Trust's expense ratios if the Trust had not borrowed, see "Risk Factors and Special Considerations - Annual Expenses Without Borrowings."

FEES AND EXPENSES OF THE TRUST

Shareholder Transaction Expenses:	
Shareholder Reinvestment Program Fees	None
Privately Negotiated Transactions:	
Sales Load (as a percentage of offering price)	3.00%
Annual Expenses (as a percentage of average net assets attributable to Common Shares):	
Management Fees ¹	1.50%
Interest Expense on Borrowed Funds	1.37%
Other Operating Expenses ²	0.16%
Total Annual Expenses	3.03%
Fee Waivers/Reimbursements/Recoupment ³	None
Net Annual Expenses	3.03%

- 1 Pursuant to the investment management agreement with the Trust, the Adviser is paid a fee of 1.05% of the Trust's Managed Assets. For the description of "Managed Assets," please see "Description of the Trust – Adviser/Sub-Adviser" earlier in this Prospectus.
- 2 Other Operating Expenses are estimated amounts for the current fiscal year and do not include the expenses of borrowing.
- 3 The Adviser is contractually obligated to limit expenses of the Trust at a rate of 1.05% of average daily Managed Assets plus 0.15% of average daily net assets through July 1, 2021. The limitation does not extend to interest, taxes, investment-related costs, leverage expenses, extraordinary expenses, and Acquired Fund Fees and Expenses. The limitation is subject to possible recoupment by the adviser within 36 months of the waiver or reimbursement and the amount of the recoupment is limited to the lesser of the amounts that would be recoupable under: (i) the expense cap in effect at the time of the waiver or reimbursement; or (ii) the expense cap in effect at the time of recoupment. Termination or modification of this obligation requires approval by the Trust's Board.

Example

The following Example shows the amount of the expenses that an investor in the Trust would bear on a \$1,000 investment that is held for the different time periods in the table. The Example assumes that all dividends and other distributions are reinvested at NAV and that the percentage amounts listed under Total Annual Expenses in the table above remain the same in the years shown. The table and the assumption in the Example of a 5% annual return are required by regulations of the SEC applicable to all investment companies. The assumed 5% annual return is not a prediction of, and does not represent, the projected or actual performance of the Trust's Common Shares. For more complete descriptions of certain of the Trust's costs and expenses, see "Investment Management and Other Service Providers."

The following Example applies to shares issued in connection with privately negotiated transactions, which have the maximum front-end sales load of 3%.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return and borrowings by the Trust in an aggregate amount equal to 30% of its Managed Assets.	\$ 60	124	192	388

The purpose of the table is to assist you in understanding the various costs and expenses that an investor in the Trust will bear directly or indirectly.

The foregoing Example should not be considered a representation of future expenses and actual expenses may be greater or less than those shown.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Trust's financial performance for the periods shown. Certain information reflects the financial results for a single share. The total returns in the table represent the rate of return that an investor would have earned or lost on an investment in the Trust (assuming reinvestment of all dividends and/or distributions). The information for the fiscal year ended February 29, 2020, has been audited by Ernst & Young LLP, whose report, along with the Trust's financial statements, is included in the Trust's Annual Report, which is available upon request. The information for the prior fiscal years or periods was audited by a different independent public accounting firm.

FINANCIAL HIGHLIGHTS (continued)

Selected data for a share of beneficial interest outstanding throughout each year or period.

Year or period ended	Per Share Operating Performance									Total Investment Return ⁽¹⁾		Ratios to average net assets				Supplemental data

(1) Total investment return calculations are attributable to common shares.

(2) Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan.

(3) Total investment return at market value has been calculated assuming a purchase at market value at the beginning of each period and a sale at market value at the

end of each period and assumes reinvestment of dividends, capital gain distributions, and return of capital/allocations, if any, in accordance with the provisions of the dividend reinvestment plan.

(4) The Adviser has entered into a written expense limitation agreement with the Trust under which it will limit the expenses of the Trust (excluding interest, taxes, investment-related costs, leverage expenses, and acquired fund fees and expenses) subject to possible recoupment by the Adviser within three years of being incurred. Amount is less than \$0.005 or more than \$(0.005).

(a) Asset coverage ratios, for fiscal year periods beginning after 2011, is presented to represent the coverage availability to each \$1,000 of borrowings. Asset coverage ratios, for periods prior to fiscal 2009, represented the coverage available for both the borrowings and Preferred Shares expressed in relation to each \$1,000 of borrowings and Preferred Shares liquidation value outstanding. The Asset coverage ratio per \$1,000 of debt

for periods subsequent to fiscal 2008, is presented to represent the coverage available to each \$1,000 of borrowings before consideration of any Preferred Shares liquidation price, while the Asset coverage inclusive of Preferred Shares, presents the coverage available to both borrowings and Preferred Shares, expressed in relation to the per share liquidation price of the Preferred Shares.

TRADING AND NAV INFORMATION

The following table shows for the Trust's Common Shares for the periods indicated: (1) the high and low closing prices as shown on the NYSE Composite Transaction Tape; (2) the NAV per Common Share represented by each of the high and low closing prices as shown on the NYSE Composite Transaction Tape; and (3) the discount from or premium to NAV per Share (expressed as a percentage) represented by these closing prices. The table also sets forth the aggregate number of shares traded as shown on the NYSE Composite Transaction Tape during the respective quarter.

Calendar Quarter Ended	Price(\$)		NAV(\$)		Premium/(Discount) To NAV(%)		Reported NYSE Volume

March 31, 2020	5.18	3.11	5.47	3.83	(4.25)	(22.80)	48,985,400

On June 5, 2020 the last reported sale price of a Common Share of the Trust's Common Shares on the NYSE was \$4.15. The Trust's NAV on June 5, 2020 was \$4.71. See "How Shares Are Priced." This represented an (11.89)% discount from the NAV, which was \$4.71 as of that date.

The Trust's Common Shares have traded in the market above, at, and below NAV since March 9, 1992, when the Trust's Common Shares were listed on the NYSE. The Trust cannot predict whether its Common Shares will trade in the future at a premium or discount to NAV, and if so, the level of such premium or discount. Shares of closed-end investment companies frequently trade at a discount from NAV.

INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The Trust's investment objective is to provide investors with as high a level of current income as is consistent with the preservation of capital. The investment objective is fundamental and may not be changed without a majority vote of the shareholders of the Trust. See "Description of the Trust – Fundamental and Non-Fundamental Investment Policies of the Trust" later in this Prospectus. The Trust seeks to achieve this investment objective by investing in the types of assets described below:

- 1. Senior Loans.** Under normal market conditions, at least 80% of the Trust's net assets (plus borrowings for investment purposes) will be invested in Senior Loans. This investment policy may be changed without shareholder approval so long as the Trust provides its shareholders with at least 60 days' prior notice of any changes in this investment policy. Under normal market conditions, the Trust invests at least 80% of its assets in Senior Loans made to corporations or other business entities organized under U.S. or Canadian law and that are domiciled in the United States and in U.S. territories and possessions or Canada.

The Senior Loans in which the Trust invests either hold the most senior position in the capital structure of the borrower, hold an equal ranking with other senior debt, or have characteristics (such as a senior position secured by liens on a borrower's assets) that the Adviser or Sub-Adviser believes justify treatment as senior debt. These Senior Loans are typically rated below investment-grade credit quality. Investments rated below investment-grade (or of similar quality if unrated) are commonly known as high-yielding, high risk investments or as "junk" investments.

The Trust typically makes its investments in Senior Loans by purchasing a portion of the overall loan, *i.e.*, the Trust becomes one of a number of lenders investing in the loan. The Trust may also make its investments in Senior Loans through the use of derivative instruments such as participations, credit-linked notes, credit default swaps, and total return swaps as long as the reference obligation for any such instrument is a Senior Loan. Investments through the use of such derivative instruments involve counterparty risk, *i.e.*, the risk that the party from which such instrument is purchased will not perform as agreed. The Trust seeks to minimize such counterparty risk by purchasing such investments only from large, well established and highly rated counterparties.

- 2. Other Investments.** Under normal market conditions, the Trust may invest up to 20% of its total assets, measured at the time of investment, in a combination of one or more of the following types of investments ("Other Investments"):
 - loans to borrowers organized or located in countries outside the United States and outside U.S. territories and possessions or Canada;
 - unsecured floating rate loans, notes, and other debt instruments;
 - floating rate subordinated loans;
 - tranches of floating rate asset-backed securities, including structured notes;
 - corporate debt securities;
 - executing repurchase and reverse repurchase agreements; and
 - equity securities incidental to investments in loans.
- 3. Cash and Short-Term Instruments.** Under normal market conditions, the Trust may invest in cash and/or short-term instruments. During periods when, in the opinion of the Adviser or Sub-Adviser, a temporary defensive posture in the market is appropriate, the Trust may hold up to 100% of its assets in cash and/or short-term instruments.
- 4. Other Investment Strategies.** The Trust may lend its portfolio securities, on a short-term or long-term basis, in an amount up to 33 ⅓% of its total assets.

Fundamental Policies

- 1. Industry Concentration.** The Trust may invest in any industry. The Trust may not invest more than 25% of its total assets, measured at the time of investment, in any single industry.
- 2. Borrower Diversification.** The Trust is diversified, as such term is defined in the 1940 Act. A diversified fund may not, as to 75% of its total assets, invest more than 5% of its total assets in any one issuer and may not purchase more than 10% of the outstanding voting securities of any one issuer (other than securities issues or guaranteed

INVESTMENT OBJECTIVE AND POLICIES (continued)

by the U.S. government or any of its agencies or instrumentalities, or other investment companies). The Trust will consider the borrower on a loan, including a loan participation, to be the issuer of such loan. With respect to no more than 25% of its total assets, the Trust may make investments that are not subject to the foregoing restrictions.

These fundamental policies may only be changed with approval by a majority of all shareholders. See “Description of the Trust – Fundamental and Non-Fundamental Investment Policies of the Trust” later in this Prospectus.

Investment Policies

The Adviser and Sub-Adviser follow certain investment policies set by the Trust’s Board. Some of those policies are set forth below. Please refer to the SAI for additional information on these and other investment policies.

1. **Limitations on currencies.** The Trust’s investments must be denominated in U.S. dollars, provided that the Trust may invest up to 15% of its total assets in investments denominated in the OECD currencies (including the euro), other than the U.S. dollar. The Trust will engage in currency exchange transactions to seek to hedge, as closely as practicable, 100% of the economic impact to the Trust arising from foreign currency fluctuations.
2. **Maturity.** Although the Trust has no restrictions on portfolio maturity, under normal market conditions, at least 80% of the Trust’s total assets will be invested in assets with remaining maturities of one to ten years. The maximum maturity on any loan in which the Trust can invest is ten years.
3. **Limitations on Other Investments.** The Trust may also invest up to 20% of its total assets, measured at the time of investment, in Other Investments. The following additional limitations apply to Other Investments:
 - **Unsecured Debt Instruments.** The Trust may not invest in unsecured floating rate loans, notes, and other debt instruments, in an aggregate amount that exceeds 20% of the Trust’s total assets, measured at the time of investment.
 - **Equities.** The Trust may acquire equity securities only as an incident to the purchase or ownership of a loan or in connection with a reorganization of a borrower or its debt.
 - **Subordinated Loans.** The Trust may not invest in floating rate subordinated loans, whether or not secured, in an aggregated amount that exceeds 5% of its total assets, measured at the time of investment.
4. **Investment Quality; Credit Analysis.** Loans in which the Trust invests generally are rated below investment-grade credit quality or are unrated. In acquiring a loan, the Adviser or Sub-Adviser will consider some or all of the following factors concerning the borrower: ability to service debt from internally generated funds; adequacy of liquidity and working capital; appropriateness of capital structure; leverage consistent with industry norms; historical experience of achieving business and financial projections; the quality and experience of management; and adequacy of collateral coverage. The Adviser or Sub-Adviser performs its own independent credit analysis of each borrower. In so doing, the Adviser or Sub-Adviser may utilize information and credit analyses from agents that originate or administer loans, other lenders investing in a loan, and other sources. The Adviser or Sub-Adviser also may communicate directly with management of the borrowers. These analyses continue on a periodic basis for any Senior Loan held by the Trust. See “Risk Factors and Special Considerations - Credit for Loans.”
5. **Use of Leverage.** The Trust may borrow money and issue Preferred Shares to the fullest extent permitted by the 1940 Act. See “Investment Objective and Policies - Policy on Borrowing” and “Investment Objective and Policies - Policy on Issuance of Preferred Shares.”
6. **Short-term Instruments.** Short-term instruments in which the Trust invests may include: (i) commercial paper rated A-1 by S&P Global Ratings (“S&P”) or P-1 by Moody’s Investors Service, Inc. (“Moody’s”), or of comparable quality as determined by the Adviser or Sub-Adviser; (ii) certificates of deposit, bankers’ acceptances, and other bank deposits and obligations; and (iii) securities issued or guaranteed by the U.S. government, its agencies, or instrumentalities.

Policy on Borrowing

The Trust has a policy of borrowing for investment purposes. The Trust seeks to use proceeds from borrowing to acquire loans and other investments which pay interest at a rate higher than the rate the Trust pays on borrowings. Accordingly, borrowing has the potential to increase the Trust’s total income available to holders of its Common Shares.

The Trust may issue notes, commercial paper, or other evidences of indebtedness and may be required to secure repayment by mortgaging, pledging, or otherwise granting a security interest in the Trust’s assets. The terms of any such borrowings will be subject to the provisions of the 1940 Act and they will also be subject to the more restrictive

INVESTMENT OBJECTIVE AND POLICIES *(continued)*

terms of any credit agreements relating to borrowings and, to the extent the Trust seeks a rating for borrowings, to additional guidelines imposed by rating agencies, which are expected to be more restrictive than the provisions of the 1940 Act. The Trust may borrow money in an amount permitted under the 1940 Act, including the rules, regulations, interpretations thereunder, and any exemptive or other relief provided by the SEC. See “Risk Factors and Special Considerations - Leverage” and “Risk Factors and Special Considerations - Restrictive Covenants and 1940 Act Restrictions.”

Policy on Issuance of Preferred Shares

The Trust has a policy which permits it to issue Preferred Shares for investment purposes. The Trust seeks to use the proceeds from Preferred Shares to acquire loans and other investments which pay interest at a rate higher than the dividends payable on Preferred Shares. The terms of the issuance of Preferred Shares are subject to the 1940 Act and to additional guidelines imposed by rating agencies, which are more restrictive than the provisions of the 1940 Act. Under the 1940 Act, the Trust may issue Preferred Shares so long as immediately after any issuance of Preferred Shares the value of the Trust’s total assets (less all Trust liabilities and indebtedness that is not senior indebtedness) is at least twice the amount of the Trust’s senior indebtedness plus the involuntary liquidation preference of all outstanding Preferred Shares. See “Risk Factors and Special Considerations - Leverage.” As of June 5, 2020 the Trust had no Preferred Shares outstanding.

THE TRUST'S INVESTMENTS

As stated under "Investment Objective and Policies," the Trust will invest primarily in Senior Loans. This section contains a discussion of the characteristics of Senior Loans and the manner in which those investments are made.

Senior Loan Characteristics

Senior Loans are loans that are typically made to business borrowers to finance leveraged buy-outs, recapitalizations, mergers, stock repurchases, and internal growth. Senior Loans generally hold the most senior position in the capital structure of a borrower and are usually secured by liens on the assets of the borrowers; including tangible assets such as cash, accounts receivable, inventory, property, plant and equipment, common and/or preferred stocks of subsidiaries; and intangible assets including trademarks, copyrights, patent rights, and franchise value. The Trust may also receive guarantees as a form of collateral.

Senior Loans are typically structured to include two or more types of loans within a single credit agreement. The most common structure is to have a revolving loan and a term loan. A revolving loan is a loan that can be drawn upon, repaid fully or partially, and then the repaid portions can be drawn upon again. A term loan is a loan that is fully drawn upon immediately and once repaid, it cannot be drawn upon again. Sometimes there may be two or more term loans and they may be secured by different collateral, have different repayment schedules and maturity dates. In addition to revolving loans and term loans, Senior Loan structures can also contain facilities for the issuance of letters of credit and may contain mechanisms for lenders to pre-fund letters of credit through credit-linked deposits.

The Trust typically invests only in the term loan portions of Senior Loan structures, although it does sometimes invest in the revolving loan portions and the pre-funded letters of credit portions.

By virtue of their senior position and collateral, Senior Loans typically provide lenders with the first right to cash flows or proceeds from the sale of a borrower's collateral if the borrower becomes insolvent (subject to the limitations of bankruptcy law, which may provide higher priority to certain claims such as employee salaries, employee pensions, and taxes). This means Senior Loans are generally repaid before unsecured bank loans, corporate bonds, subordinated debt, trade creditors, and preferred or common stockholders.

Senior Loans typically pay interest at least quarterly at rates which equal a fixed percentage spread over a base rate such as the London Inter-Bank Offered Rate ("LIBOR"). For example, if LIBOR were 3% and the borrower were paying a fixed spread of 2.50%, the total interest rate paid by the borrower would be 5.50%. Base rates, and therefore the total rates paid on Senior Loans, float, *i.e.*, they change as market rates of interest change.

Although a base rate such as LIBOR can change every day, loan agreements for Senior Loans typically allow the borrower the ability to choose how often the base rate for its loan will change. A single loan may have multiple reset periods at the same time, with each reset period applicable to a designated portion of the loan. Such periods can range from one day to one year, with most borrowers choosing monthly or quarterly reset periods. During periods of rising interest rates, borrowers will tend to choose longer reset periods, and during periods of declining interest rates, borrowers will tend to choose shorter reset periods. The fixed spread over the base rate on a Senior Loan typically does not change.

Senior Loans generally are arranged through private negotiations between a borrower and several financial institutions represented by an agent who is usually one of the originating lenders. In larger transactions, it is common to have several agents; however, generally only one such agent has primary responsibility for ongoing administration of a Senior Loan. Agents are typically paid fees by the borrower for their services. The agent is primarily responsible for negotiating the loan agreement which establishes the terms and conditions of the Senior Loan and the rights of the borrower and the lenders. The agent also is responsible for monitoring collateral and for exercising remedies available to the lenders such as foreclosure upon collateral.

Loan agreements may provide for the termination of the agent's agency status in the event that it fails to act as required under the relevant loan agreement, becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy. Should such an agent, lender, or assignor with respect to an assignment interpositioned between the Trust and the borrower become insolvent or enter FDIC receivership or bankruptcy, any interest in the Senior Loan of such person and any loan payment held by such person for the benefit of the Trust should not be included in such person's or entity's bankruptcy estate. If, however, any such amount were included in such person's or entity's bankruptcy estate, the Trust would incur certain costs and delays in realizing payment or could suffer a loss of principal or interest. In this event, the Trust could experience a decrease in the NAV.

THE TRUST'S INVESTMENTS *(continued)*

The Trust acquires Senior Loans from lenders such as commercial and investment banks, insurance companies, finance companies, other investment companies, and private investment funds.

Investment by the Trust

The Trust typically invests in Senior Loans primarily by purchasing an assignment of a portion of a Senior Loan from a third party, either in connection with the original loan transaction (*i.e.*, in the primary market) or after the initial loan transaction (*i.e.*, in the secondary market). When the Trust purchases a Senior Loan in the primary market, it may share in a fee paid to the original lender. When the Trust purchases a Senior Loan in the secondary market, it may pay a fee to, or forego a portion of interest payments from, the lender making the assignment. The Trust may also make its investments in Senior Loans through the use of derivative instruments such as participations, credit-linked notes, credit default swaps, and total return swaps as long as the reference obligation for any such instrument is a Senior Loan. Investments through the use of such derivative instruments involve counterparty risk, *i.e.*, the risk that the party from which such instrument is purchased will not perform as agreed. Unlike an assignment as described below, the Trust does not have a direct contractual relationship with the borrower. The Trust seeks to minimize such counterparty risk by purchasing such investments only from large, well-established, and highly-rated counterparties.

There is no minimum rating or other independent evaluation of a borrower limiting the Trust's investments and most Senior Loans that the Trust may acquire, if rated, will be rated below investment-grade credit quality. See "Risk Factors and Special Considerations - Credit for Loans."

Assignments. When the Trust is a purchaser of an assignment, it succeeds to all the rights and obligations under the loan agreement of the assigning lender and becomes a lender under the loan agreement with the same rights and obligations as the assigning lender. These rights include the ability to vote along with the other lenders on such matters as enforcing the terms of the loan agreement (*e.g.*, declaring defaults, initiating collection action, *etc.*). Taking such actions typically requires at least a vote of the lenders holding a majority of the investment in the loan and may require a vote by lenders holding two-thirds or more of the investment in the loan. Because the Trust usually does not hold a majority of the investment in any loan, it will not be able by itself to control decisions that require a vote by the lenders.

Acquisition Costs. When the Trust acquires an interest in a Senior Loan in the primary market, it typically acquires the loan at par value less its portion of the fee paid to all originating lenders. When the Trust acquires an interest in a Senior Loan in the secondary market, it may be at par value but typically the Trust will do so at premium or discount to par value.

RISK FACTORS AND SPECIAL CONSIDERATIONS

Risk is inherent in all investing. The following discussion summarizes some of the risks that you should consider before deciding whether to invest in the Trust. For additional information about the risks associated with investing in the Trust, please see the SAI.

Asset-Backed Securities: Defaults on, or low credit quality or liquidity of the underlying assets of the asset-backed securities may impair the value of these securities and result in losses. There may be limitations on the enforceability of any security interest or collateral granted with respect to those underlying assets and the value of collateral may not satisfy the obligation upon default. These securities also present a higher degree of prepayment and extension risk and interest rate risk than do other types of debt instruments. Because of prepayment risk and extension risk, small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain asset-backed securities. The value of longer-term securities generally changes more in response to changes in market interest rates than shorter term securities.

These securities may be significantly affected by government regulation, market interest rates, market perception of the creditworthiness of an issuer servicer, and loan-to-value ratio of the underlying assets. During an economic downturn, the mortgages, commercial or consumer loans, trade or credit card receivables, installment purchase obligations, leases, or other debt obligations underlying an asset-backed security may experience an increase in defaults as borrowers experience difficulties in repaying their loans which may cause the valuation of such securities to be more volatile and may reduce the value of such securities. These risks are particularly heightened for investments in asset-backed securities that contain sub-prime loans which are loans made to borrowers with weakened credit histories and often have higher default rates.

Bank Instruments: Bank instruments include certificates of deposit, fixed time deposits, bankers' acceptances, and other debt and deposit-type obligations issued by banks. Changes in economic, regulatory or political conditions, or other events that affect the banking industry may have an adverse effect on bank instruments or banking institutions that serve as counterparties in transactions with the Trust.

Corporate Debt Instruments: Corporate debt instruments are subject to the risk of the issuer's inability to meet principal and interest payments on the obligation. The value of corporate debt instruments may be subject to price volatility due to such factors as market interest rates, market perception of the creditworthiness of the issuer, and general market liquidity. When market interest rates decline, the value of corporate debt instruments can be expected to rise, and when market interest rates rise, the value of those securities can be expected to decline. Corporate debt instruments with longer maturities tend to be more sensitive to market interest rate movements than those with shorter maturities.

Credit Default Swaps: The Trust may enter into credit default swaps, either as a buyer or a seller of the swap. A buyer of a swap pays a fee to buy protection against the risk that a security will default. If no default occurs, the Trust will have paid the fee, but typically will recover nothing under the swap. A seller of a swap receives payment(s) in return for an obligation to pay the counterparty the full notional value of a security in the event of a default of the security issuer. As a seller of a swap, the Trust would effectively add leverage to its portfolio because, in addition to its total net assets, the Trust would be subject to investment exposure on the full notional value of the swap. Credit default swaps are particularly subject to counterparty, credit, valuation, liquidity and leveraging risks and the risk that the swap may not correlate with its underlying asset as expected. Certain standardized swaps are subject to mandatory central clearing. Central clearing is expected to reduce counterparty credit risk and increase liquidity; however, there is no assurance that central clearing will achieve that result, and in the meantime, central clearing and related requirements expose the Trust to new kinds of costs and risks. In addition, credit default swaps expose the Trust to the risk of improper valuation.

Credit Facility: The Trust has a policy of borrowing to acquire income-producing investments. The Trust currently is a party to a credit facility with State Street Bank and Trust Company and The Bank of Nova Scotia that permits the Trust to borrow up to an aggregate amount of \$351 million. Interest is payable on the amounts borrowed under the credit facility as well as a benchmark rate such as LIBOR or the federal funds rate, plus a facility fee on unused commitments. The lender under the credit facility has a security interest in all assets of the Trust. As of June 5, 2020 the Trust had \$239.6 million in outstanding borrowings under one credit facility.

Under the credit facility, the lender has the right to liquidate Trust assets in the event of default by the Trust, and the Trust may be prohibited from paying dividends in the event of a material adverse event or condition regarding the Trust, the Adviser, or Sub-Adviser until outstanding debts are paid or until the event or condition is cured.

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

Credit (Loans): Prices of the Trust's investments are likely to fall if the actual or perceived financial health of the borrowers on, or issuers of, such investments deteriorates, whether because of broad economic or issuer-specific reasons, or if the borrower or issuer is late (or defaults) in paying interest or principal. The Trust invests a substantial portion of its assets in below investment-grade Senior Loans and other below investment-grade assets. Below investment-grade loans commonly known as high-yielding, high risk investments or as "junk" investments involve a greater risk that borrowers may not make timely payment of the interest and principal due on their loans and are subject to greater levels of credit and liquidity risks. They also involve a greater risk that the value of such loans could decline significantly. If borrowers do not make timely payments of the interest due on their loans, the yield on the Common Shares will decrease. If borrowers do not make timely payment of the principal due on their loans, or if the value of such loans decreases, the net asset value will decrease.

The Trust generally invests in loans that are senior in the capital structure of the borrower or issuer, hold an equal ranking with other senior debt, or have characteristics (such as a senior position secured by liens on a borrower's assets) that the manager believes justify treatment as senior debt. Loans that are senior and secured generally involve less risk than unsecured or subordinated debt and equity instruments of the same borrower because the payment of principal and interest on senior loans is an obligation of the borrower that, in most instances, takes precedence over the payment of dividends or the return of capital to the borrower's shareholders, and payments to bond holders; and because of the collateral supporting the repayment of the debt instrument. However, the value of the collateral may not equal the Trust's investment when the debt instrument is acquired or may decline below the principal amount of the debt instrument subsequent to the Trust's investment. Also, to the extent that collateral consists of stocks of the borrower, or its subsidiaries or affiliates, the Trust bears the risk that the stocks may decline in value, be relatively illiquid, or may lose all or substantially all of their value, causing the Trust's investment to be undercollateralized. Therefore, the liquidation of the collateral underlying a loan in which the Trust has invested, may not satisfy the borrower's obligation to the Trust in the event of non-payment of scheduled interest or principal, and the collateral may not be able to be readily liquidated. In addition, it is possible that disputes as to the nature or identity of the collateral securing a loan may delay the Trust's ability to realize on the collateral or, if the dispute is resolved adversely to the Trust, may prevent the Trust from realizing on assets it had considered to constitute collateral.

In the event of the bankruptcy of a borrower or issuer, the Trust could experience delays and limitations on its ability to realize the benefits of the collateral securing the investment. Among the risks involved in a bankruptcy are assertions that the pledge of collateral to secure a loan constitutes a fraudulent conveyance or preferential transfer that would have the effect of nullifying or subordinating the Trust's rights to the collateral.

The Senior Loans in which the Trust invests are generally rated lower than investment-grade credit quality, *i.e.*, rated lower than Baa by Moody's Investors Service, Inc. or BBB by S&P Global Ratings, or have been issued by issuers who have issued other debt instruments which, if unrated, would be rated lower than investment-grade credit quality.

Lower quality securities (including securities that have fallen below investment-grade and are classified as "junk bonds" or "high yield securities") have greater credit risk and liquidity risk than higher quality (investment-grade) securities, and their issuers' long-term ability to make payments is considered speculative. Prices of lower quality bonds or other debt instruments are also more volatile, are more sensitive to negative news about the economy or the issuer, and have greater liquidity and price volatility risk. Investment decisions are based largely on the credit analysis performed by the manager, and not on rating agency evaluation. This analysis may be difficult to perform. Information about a loan and its borrower generally is not in the public domain. Investors in loans may not be afforded the protections of the anti-fraud provisions of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, because loans may not be considered "securities" under such laws. In addition, many borrowers have not issued securities to the public and are not subject to reporting requirements under federal securities laws. Generally, however, borrowers are required to provide financial information to lenders and information may be available from other loan market participants or agents that originate or administer loans.

Demand for Loans: An increase in demand for loans may benefit the Trust by providing increased liquidity for such loans and higher sales prices, but it may also adversely affect the rate of interest payable on such loans and the rights provided to the Trust under the terms of the applicable loan agreement, and may increase the price of loans in the secondary market. A decrease in the demand for loans may adversely affect the price of loans in the Trust's portfolio, which could cause the Trust's net asset value to decline and reduce the liquidity of the Trust's loan holdings.

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

Derivative Instruments: Derivative instruments are subject to a number of risks, including the risk of changes in the market price of the underlying securities, credit risk with respect to the counterparty, risk of loss due to changes in market interest rates and liquidity and volatility risk. The amounts required to purchase certain derivatives may be small relative to the magnitude of exposure assumed by the Trust. Therefore, the purchase of certain derivatives may have an economic leveraging effect on the Trust and exaggerate any increase or decrease in the net asset value. Derivatives may not perform as expected, so the Trust may not realize the intended benefits. When used for hedging purposes, the change in value of a derivative may not correlate as expected with the currency, security or other risk being hedged. When used as an alternative or substitute for direct cash investment, the return provided by the derivative may not provide the same return as direct cash investment. In addition, given their complexity, derivatives expose the Trust to the risk of improper valuation. Generally, derivatives are sophisticated financial instruments whose performance is derived, at least in part, from the performance of an underlying asset or assets. Derivatives include, among other things, swap agreements, options, forward foreign currency exchange contracts, and futures. Investments in derivatives are generally negotiated over-the-counter with a single counterparty and as a result are subject to credit risks related to the counterparty's ability or willingness to perform its obligations; any deterioration in the counterparty's creditworthiness could adversely affect the value of the derivative. In addition, derivatives and their underlying securities may experience periods of illiquidity which could cause the Trust to hold a security it might otherwise sell, or to sell a security it otherwise might hold at inopportune times or at an unanticipated price. A manager might imperfectly judge the direction of the market. For instance, if a derivative is used as a hedge to offset investment risk in another security, the hedge might not correlate to the market's movements and may have unexpected or undesired results such as a loss or a reduction in gains. The U.S. government has enacted legislation that provides for new regulation of the derivatives market, including clearing, margin, reporting, and registration requirements. The European Union (and other countries outside of the European Union) has implemented similar requirements, which affects the Trust when it enters into a derivatives transaction with a counterparty organized in that country or otherwise subject to that country's derivatives regulations. Because these requirements are new and evolving (and some of the rules are not yet final), their ultimate impact remains unclear. Central clearing is expected to reduce counterparty risk and increase liquidity, however, there is no assurance that it will achieve that result, and in the meantime, central clearing and related requirements expose the Trust to new kinds of costs and risks.

Equity Securities Incidental to Investments in Loans: Investments in equity securities incidental to investment in loans entail certain risks in addition to those associated with investments in loans. The value of such equity securities may change more rapidly, and to a greater extent, than fixed-income debt instruments issued by the same issuer in response to company-specific developments and general market conditions. The Trust's holdings of equity securities may increase fluctuations in the Trust's net asset value. The Trust may frequently possess material non-public information about a borrower as a result of its ownership of a loan of such borrower. Because of prohibitions on trading in securities of issuers while in possession of such information, the Trust might be unable to enter into a transaction in a security of such a borrower when it would otherwise be advantageous to do so.

Impact of Shareholder Reinvestment Program and Privately Negotiated Transactions: The issuance of Common Shares through the Shareholder Reinvestment Program and/or through privately negotiated transactions may have an adverse effect on the secondary market for the Common Shares. The increase in the number of the outstanding Common Shares resulting from issuances pursuant to the Shareholder Reinvestment Program or pursuant to privately negotiated transactions, and the discount to the market price at which such Common Shares may be issued, may put downward pressure on the market price for Common Shares. Common Shares will not be issued pursuant to the Shareholder Reinvestment Program at any time when Common Shares are trading at a price lower than the net asset value per Common Share.

Interest Rate: Changes in short-term market interest rates will directly affect the yield on Common Shares. If short-term market interest rates fall, the yield on Common Shares will also fall. To the extent that the interest rate spreads on loans in the Trust's portfolio experience a general decline, the yield on the Common Shares will fall and the value of the Trust's assets may decrease, which will cause the Trust's net asset value to decrease. Conversely, when short-term market interest rates rise, because of the lag between changes in such short-term rates and the resetting of the floating rates on assets in the Trust's portfolio, the impact of rising rates will be delayed to the extent of such lag. In the case of inverse securities, the interest rate paid by such securities generally will decrease when the market rate

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

of interest to which the inverse security is indexed increases. With respect to investments in fixed rate instruments, a rise in market interest rates generally causes values of such instruments to fall. The values of fixed rate instruments with longer maturities or duration are more sensitive to changes in market interest rates.

As of the date of this Prospectus, market interest rates in the United States are at or near historic lows, which may increase the Trust's exposure to risks associated with rising market interest rates. Rising market interest rates could have unpredictable effects on the markets and may expose fixed-income and related markets to heightened volatility, which could reduce liquidity for certain investments, adversely affect values, and increase costs. If dealer capacity in fixed-income and related markets is insufficient for market conditions, it may further inhibit liquidity and increase volatility in the fixed-income and related markets. Further, recent and potential changes in government policy may affect interest rates.

Market interest rate changes also may cause the Trust's net asset value to experience moderate volatility. This is because the value of a loan asset held by the Trust is partially a function of whether it is paying what the market perceives to be a market rate of interest for the particular loan, given its individual credit and other characteristics. If market interest rates change, a loan's value could be affected to the extent the interest rate paid on that loan does not reset at the same time. As discussed above, the Trust will ordinarily maintain a dollar-weighted average time until the next interest rate adjustment on its loans of 90 days or less. Therefore, the impact of the lag between a change in market interest rates and the change in the overall rate on the portfolio is expected to be minimal.

To the extent that changes in market rates of interest are reflected not in a change to a base rate such as LIBOR but in a change in the spread over the base rate which is payable on loans of the type and quality in which the Trust invests, the Trust's net asset value could also be adversely affected. However, unlike changes in market rates of interest for which there is only a temporary lag before the portfolio reflects those changes, changes in a loan's value based on changes in the market spread on loans in the Trust's portfolio may be of longer duration.

Finally, substantial increases in interest rates may cause an increase in loan defaults as borrowers may lack the resources to meet higher debt service requirements. In the case of inverse securities, the interest rate paid by the securities is a floating rate, which generally will decrease when the market rate of interest to which the inverse security is indexed increases and will increase when the market rate of interest to which the inverse security is indexed decreases.

Leverage: The use of leverage through borrowings or the issuance of Preferred Shares can adversely affect the yield on the Common Shares. To the extent that the Trust is unable to invest the proceeds from the use of leverage in assets which pay interest at a rate which exceeds the rate paid on the leverage, the yield on the Common Shares will decrease. In addition, in the event of a general market decline in the value of assets such as those in which the Trust invests, the effect of that decline will be magnified in the Trust because of the additional assets purchased with the proceeds of the leverage. Further, because the fee paid to the Adviser will be calculated on the basis of Managed Assets, the fee will be higher when leverage is utilized, giving the Adviser an incentive to utilize leverage. The Trust is subject to certain restrictions imposed by lenders to the Trust and may be subject to certain restrictions imposed by guidelines of one or more rating agencies which may issue ratings for debt or the Preferred Shares issued by the Trust. These restrictions are expected to impose asset coverage, fund composition requirements and limits on investment techniques, such as the use of financial derivative products that are more stringent than those imposed on the Trust by the 1940 Act. These restrictions could impede the manager from fully managing the Trust's portfolio in accordance with the Trust's investment objective and policies. As of June 5, 2020 the Trust had \$239.6 million in outstanding borrowings under one credit facility.

The Trust is permitted to borrow an amount up to 33 $\frac{1}{3}$ %, or such other percentage permitted by law, of its total assets (including the amount borrowed) less all liabilities other than borrowings. The Trust may also issue Preferred Shares so long as immediately after any issuance of Preferred Shares, the value of the Trust's total assets (less all Trust liabilities and indebtedness that is not senior indebtedness for 1940 Act purposes) is at least twice the amount of the Trust's senior indebtedness plus the involuntary liquidation preference of all outstanding shares. As of the date of this Prospectus, the Trust had no Preferred Shares outstanding. Borrowings and the issuance of Preferred Shares are referred to in this Prospectus collectively as "leverage." The Trust may use leverage for investment purposes, to finance the repurchase of its Common Shares, and to meet other cash requirements. The use of leverage for investment purposes increases both investment opportunity and investment risk.

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

Capital raised through leverage will be subject to interest and other costs, and these costs could exceed the income earned by the Trust on the proceeds of such leverage. There can be no assurance that the Trust's income from the proceeds of leverage will exceed these costs. The manager seeks to use leverage for the purposes of making additional investments only if they believe, at the time of using leverage, that the total return on the assets purchased with such funds will exceed interest payments and other costs on the leverage.

The Trust currently uses leverage by borrowing money on a floating rate basis. The current rate on borrowings as of June 5, 2020 is 1.13%.

The Trust's leveraged capital structure creates special risks not associated with unleveraged funds having similar investment objectives and policies. The funds borrowed pursuant to the credit facilities or obtained through any issuance of Preferred Shares may constitute a substantial lien and burden by reason of their prior claim against the income of the Trust and against the net assets of the Trust in liquidation.

The Trust is not permitted to declare dividends or other distributions, including dividends and distributions with respect to Common Shares or Preferred Shares, or to purchase Common Shares or Preferred Shares unless: (i) at the time thereof the Trust meets certain asset coverage requirements; and (ii) there is no event of default under any credit facility program that is continuing. See "Risk Factors and Special Considerations - Restrictive Covenants and 1940 Act Restrictions" later in this Prospectus. In the event of a default under a credit facility program, the lenders have the right to cause a liquidation of the collateral (*i.e.*, sell assets of the Trust) and, if any such default is not cured, the lenders may be able to control the liquidation as well.

In addition, the Trust is not permitted to pay dividends on, or redeem or repurchase, Common Shares unless all accrued dividends on any Preferred Shares and all accrued interest on borrowings have been paid or set aside for payment.

Annual Expenses Without Borrowings

If the Trust were not to have borrowed, the remaining expenses, as a percentage of the net assets of the Trust, would be as follows:

Annual Expenses Without Borrowings (as a percentage of net assets attributable to Common Shares)	
Management Fees (as a percentage of Managed Assets) ¹	1.05%
Other Operating Expenses ²	0.16%
Total Annual Expenses	1.21%
Fee Waivers/Reimbursements/Recoupment ³	None
Net Annual Expenses	1.21%

1 Pursuant to the investment management agreement with the Trust, the Adviser is paid a fee of 1.05% of the Trust's Managed Assets. For the description of "Managed Assets," please see "Description of the Trust – Adviser/Sub-Adviser" earlier in this Prospectus.

2 Other Operating Expenses are estimated amounts for the current fiscal year and do not include the expenses of borrowing.

3 The Adviser is contractually obligated to limit expenses of the Trust at a rate of 1.05% of average daily Managed Assets plus 0.15% of average daily net assets through July 1, 2021. The limitation does not extend to interest, taxes, investment-related costs, leverage expenses, extraordinary expenses, and Acquired Fund Fees and Expenses. The limitation is subject to possible recoupment by the adviser within 36 months of the waiver or reimbursement and the amount of the recoupment is limited to the lesser of the amounts that would be recoupable under: (i) the expense cap in effect at the time of the waiver or reimbursement; or (ii) the expense cap in effect at the time of recoupment. Termination or modification of this obligation requires approval by the Trust's Board.

Effect of Leverage

To cover the annual interest payments on the borrowings for the current fiscal year (assuming that the current rate remains in effect for the entire fiscal year and assuming that the Trust borrows an amount equal to 30% of its Managed Assets as of June 5, 2020) the Trust would need to experience an annual return of 0.34% on its portfolio (including the assets purchased with the assumed leverage) to cover such annual interest.

The following table is designed to illustrate the effect on return to a holder of the Trust's Common Shares of the leverage created by the Trust's use of borrowing, using the average annual interest rate of 3.19% for the fiscal year ended February 29, 2020, assuming the Trust has used leverage by borrowing an amount equal to 30% of the Trust's Managed Assets and assuming hypothetical annual returns on the Trust's portfolio of minus 10% to plus 10%. As can be seen, leverage generally increases the return to shareholders when portfolio return is positive and decreases return when the portfolio return is negative. Actual returns may be greater or less than those appearing in the table.

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

Assumed Portfolio Return, net of expenses ¹	-10%	-5%	0%	5%	10%
Corresponding Return to Common Shareholders ²	-15.65%	-8.51%	-1.37%	5.78%	12.92%

1 The Assumed Portfolio Return is required by regulation of the SEC and is not a prediction of, and does not represent, the projected or actual performance of the Trust.

2 In order to compute the Corresponding Return to Common Shareholders, the Assumed Portfolio Return is multiplied by the total value of the Trust's assets at the beginning of the Trust's fiscal year to obtain an assumed return to the Trust. From this amount, all interest accrued during the year is subtracted to determine the return available to shareholders. The return available to shareholders is then divided by the total value of the Trust's net assets attributable to Common Shares as of the beginning of the fiscal year to determine the Corresponding Return to Common Shareholders.

Limited Secondary Market for Loans: Because of the limited secondary market for loans, the Trust may be limited in its ability to sell loans in its portfolio in a timely fashion and/or at a favorable price. Furthermore, transactions in loans typically settle on a delayed basis and typically take longer than 7 days to settle. As a result the Trust may not receive the proceeds from a sale of a floating rate loan for a significant period of time which may affect the Trust's ability to repay debt, to pay dividends, to pay expenses, or to take advantage of new investment opportunities. Although the re-sale, or secondary market for loans has grown substantially over the past decade, both in overall size and number of market participants, there is no organized exchange or board of trade on which loans are traded. Instead, the secondary market for loans is a private, unregulated inter-dealer or inter-bank re-sale market.

Loans usually trade in large denominations and trades can be infrequent and the market for loans may experience volatility. The market has limited transparency so that information about actual trades may be difficult to obtain. Accordingly, some loans will be relatively illiquid.

In addition, loans may require the consent of the borrower and/or the agent prior to sale or assignment. These consent requirements can delay or impede the Trust's ability to sell loans and can adversely affect the price that can be obtained.

These considerations may cause the Trust to sell assets at lower prices than it would otherwise consider to meet cash needs or cause the Trust to maintain a greater portion of its assets in cash equivalents than it would otherwise, which could negatively impact performance. The Trust may seek to avoid the necessity of selling assets to meet such needs by the use of borrowings.

From time to time, the occurrence of one or more of the factors described above may create a cascading effect where the market for debt instruments (including the market for loans) first experiences volatility and then decreased liquidity. Such conditions, or other similar conditions, may then adversely affect the value of loans and other instruments, widening spreads against higher-quality debt instruments, and making it harder to sell loans at prices at which they have historically or recently traded, thereby further reducing liquidity. For example, during the global liquidity crisis in the second half of 2008, the average price of loans in the S&P/LSTA Leveraged Loan Index (which includes loans of the type in which the Trust invests) declined by 32% (which included a decline of 3.06% on a single day).

Manager: The Trust is subject to manager risk because it is an actively managed investment portfolio. The adviser, the sub-adviser or each individual portfolio manager will make judgments and apply investment techniques and risk analyses in making investment decisions, but there can be no guarantee that these decisions will produce the desired results.

Market Discount: Shares of closed-end investment companies frequently trade at a discount from their net asset value. The possibility that Common Shares will trade at a discount from their net asset value is a risk separate and distinct from the risk that the net asset value may decrease. The reasons for the Common Shares trading from time to time at a premium to or discount from net asset value are not known to the Trust, and the Trust cannot predict whether its Common Shares will trade in the future at a premium to or discount from net asset value, and if so, the level of such premium or discount.

Market Disruption and Geopolitical: The Trust is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Due to the increasing interdependence among global economies and markets, conditions in one country, market, or region might adversely impact markets, issuers and/or foreign exchange rates in other countries, including the U.S. War, terrorism, global health crises and pandemics, and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on U.S. and world economies and markets generally. For example, the recent COVID-19 pandemic has resulted, and may continue to result, in significant market volatility, exchange trading suspensions and closures, declines in global financial markets, higher default rates, and a substantial economic downturn in economies throughout the world. Natural and environmental disasters and systemic market dislocations are also highly disruptive

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

to economies and markets. Those events as well as other changes in non-U.S. and domestic economic, social, and political conditions also could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, credit ratings, inflation, investor sentiment, and other factors affecting the value of the investments of the Trust and the Trust. Any of these occurrences could disrupt the operations of the Trust and of the Trust's service providers.

Non-U.S. and Non-Canadian Issuers: Investment in foreign borrowers involves special risks, including that foreign borrowers may be subject to: less rigorous regulatory, accounting, and reporting requirements than U.S. borrowers; differing legal systems and laws relating to creditors' rights; the potential inability to enforce legal judgments; economic adversity that would result if the value of the borrower's non-U.S. dollar denominated revenues and assets were to fall because of fluctuations in currency values; and the potential for political, social, and economic adversity in the foreign borrower's country. The Trust may invest up to 15% of its total assets in investments denominated in OECD currencies (including the euro), other than the U.S. dollar.

The Trust will engage in currency exchange transactions to seek to hedge, as closely as practicable, 100% of the economic impact to the Trust arising from foreign currency fluctuations.

Operational: The Trust, its service providers, and other market participants increasingly depend on complex information technology and communications systems to conduct business functions. These systems are subject to a number of different threats or risks that could adversely affect the Trust and its shareholders, despite the efforts of the Trust and its service providers to adopt technologies, processes, and practices intended to mitigate these risks. Cyber-attacks, disruptions, or failures that affect the Trust's service providers, counterparties, market participants, or issuers of securities held by the Trust may adversely affect the Trust and its shareholders, including by causing losses or impairing the Trust's operations.

Prepayment and Extension: Many types of debt instruments are subject to prepayment and extension risk. Prepayment risk is the risk that the issuer of a debt instrument will pay back the principal earlier than expected. This may occur when interest rates decline. Prepayment may expose the Trust to a lower rate of return upon reinvestment of principal. Also, if a debt instrument subject to prepayment has been purchased at a premium, the value of the premium would be lost in the event of prepayment. Extension risk is the risk that the issuer of a debt instrument will pay back the principal later than expected. This may occur when interest rates rise. This may negatively affect performance, as the value of the debt instrument decreases when principal payments are made later than expected. Additionally, the Trust may be prevented from investing proceeds it would have received at a given time at the higher prevailing interest rates. Loans typically do not have call protection and may be prepaid partially or in full at any time without penalty.

Ranking of Senior Indebtedness: The rights of lenders to receive payments of interest and repayments of principal of any borrowings made by the Trust under the credit facility program are senior to the rights of holders of Common Shares and Preferred Shares with respect to the payment of dividends or upon liquidation.

Repurchase Agreements: In the event that the other party to a repurchase agreement defaults on its obligations, the Trust would generally seek to sell the underlying security serving as collateral for the repurchase agreement. However, the value of collateral may be insufficient to satisfy the counterparty's obligation and/or the Trust may encounter delay and incur costs before being able to sell the security. Such a delay may involve loss of interest or a decline in price of the security, which could result in a loss. In addition, if the Trust is characterized by a court as an unsecured creditor, it would be at risk of losing some or all of the principal and interest involved in the transaction.

Restrictive Covenants and 1940 Act Restrictions: The credit agreements governing the credit facility program ("Credit Agreements") include usual and customary covenants for this type of transaction, including limits on the Trust's ability to: (i) issue Preferred Shares; (ii) incur liens or pledge portfolio securities; (iii) change its investment objective or fundamental investment restrictions without the approval of lenders; (iv) make changes in any of its business objectives, purposes, or operations that could result in a material adverse effect; (v) make any changes in its capital structure; (vi) amend the Trust documents in a manner which could adversely affect the rights, interests, or obligations of any of the lenders; (vii) engage in any business other than the businesses currently engaged in; (viii) create, incur, assume, or permit to exist certain debt except for certain specified types of debt; and (ix) permit any of its Employee Retirement Income Security Act of 1974 ("ERISA") affiliates to cause or permit to occur an event that could result in the imposition of a lien under the Internal Revenue Code of 1986 or ERISA. In addition, the Credit Agreements do not permit the

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

Trust's asset coverage ratio (as defined in the Credit Agreements) to fall below 300% at any time ("Credit Agreement Asset Coverage Test"). These covenants or guidelines could impede the manager from fully managing the Trust's portfolio in accordance with the investment objectives and policies.

Under the requirements of the 1940 Act, the Trust must have asset coverage of at least 300% immediately after any borrowing under a credit facility program. For this purpose, asset coverage means the ratio which the value of the total assets of the Trust, less liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of borrowings represented by senior securities issued by the Trust.

The Credit Agreements limit the Trust's ability to pay dividends or make other distributions on the Common Shares, or purchase or redeem Common Shares, unless the Trust complies with the Credit Agreement Asset Coverage Test. In addition, the Credit Agreements do not permit the Trust to declare dividends or other distributions or purchase or redeem Common Shares: (i) at any time that an event of default under the credit agreement has occurred and is continuing; or (ii) if, after giving effect to such declaration, the Trust would not meet the Credit Agreement Asset Coverage Test set forth in the Credit Agreements.

Securities Lending: To generate additional income, the Trust may lend portfolio securities, on a short- or long-term basis, in an amount up to 33 $\frac{1}{3}$ % of the Trust's total assets, to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities. When the Trust lends its securities, it is responsible for investing the cash collateral it receives from the borrower of the securities, and the Trust could incur losses in connection with the investment of such cash collateral. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower default or fail financially. The Trust intends to engage in lending portfolio securities only when such lending is fully secured by investment-grade collateral held by an independent agent.

Short-Term Debt Instruments: Short-term debt instruments are subject to the risk of the issuer's inability to meet principal and interest payments on the obligation and also may be subject to price volatility due to such factors as market interest rates, market perception of the creditworthiness of the issuer, and general market liquidity. Because short-term debt instruments typically pay interest at a fixed-rate, when market interest rates decline, the value of the Trust's short-term debt instruments can be expected to rise, and when market interest rates rise, the value of those securities can be expected to decline.

Temporary Defensive Positions: When market conditions make it advisable, the Trust may hold a portion of its assets in cash and short-term interest bearing instruments. Moreover, in periods when, in the opinion of the manager, a temporary defensive position is appropriate, up to 100% of the Trust's assets may be held in cash, short-term interest bearing instruments and/or any other securities the manager considers consistent with a temporary defensive position. The Trust may not achieve its investment objective when pursuing a temporary defensive position.

Unsecured Debt Instruments and Subordinated Loans: Unsecured loans and subordinated loans share the same credit risks as those discussed under "Risk Factors and Special Considerations - Credit for Loans" except that unsecured loans are not secured by any collateral of the borrower and subordinated loans are not the most senior debt in a borrower's capital structure. Unsecured loans do not enjoy the security associated with collateralization and may pose a greater risk of nonpayment of interest or loss of principal than do secured loans. The primary additional risk in a subordinated loan is the potential loss in the event of default by the issuer of the loan. Subordinated loans in an insolvency bear an increased share, relative to senior secured lenders, of the ultimate risk that the borrower's assets are insufficient to meet its obligations to its creditors.

Valuation of Loans: The Trust values its assets daily. However, because the secondary market for floating rate loans is limited, it may be difficult to value loans, exposing the Trust to the risk that the price at which it sells loans will be less than the price at which they were valued when held by the Trust. Reliable market value quotations may not be readily available for some loans and determining the fair valuation of such loans may require more research than for securities that trade in a more active secondary market. In addition, elements of judgment may play a greater role in the valuation of loans than for more securities that trade in a more developed secondary market because there is less reliable, objective market value data available. If the Trust purchases a relatively large portion of a loan, the limitations of the secondary market may inhibit the Trust from selling a portion of the loan and reducing its exposure to a borrower when the manager deems it advisable to do so. Even if the Trust itself does not own a relatively large portion of a particular loan, the Trust, in combination with other similar accounts under management by the same portfolio managers, may own large portions of loans. The aggregate amount of holdings could create similar risks if and when the portfolio managers decide to sell those loans. These risks could include, for example, the risk that the

RISK FACTORS AND SPECIAL CONSIDERATIONS *(continued)*

sale of an initial portion of the loan could be at a price lower than the price at which the loan was valued by the Trust, the risk that the initial sale could adversely impact the price at which additional portions of the loan are sold, and the risk that the foregoing events could warrant a reduced valuation being assigned to the remaining portion of the loan still owned by the Trust.

HOW SHARES ARE PRICED

The Trust is open for business every day the NYSE opens for regular trading (each such day, a “Business Day”). The net asset value (“NAV”) per Common Share of the Trust is determined each Business Day as of the close of the regular trading session (“Market Close”), as determined by the Consolidated Tape Association (“CTA”), the central distributor of transaction prices for exchange-traded securities (normally 4:00 p.m. Eastern time unless otherwise designated by the CTA). The data reflected on the consolidated tape provided by the CTA is generated by various market centers, including all securities exchanges, electronic communications networks, and third-market broker-dealers. The NAV per Common Share of the Trust is calculated by dividing the value of the Trust’s loan assets plus all cash and other assets (including accrued expenses but excluding capital and surplus) attributable to the Common Shares by the number of Common Shares outstanding. The NAV per Common Shares is made available for publication. On days when the Trust is closed for business, Trust Common Shares will not be priced and the Trust does not transact purchase and redemption orders. To the extent the Trust’s assets are traded in other markets on days when the Trust does not price its Common Shares, the value of the Trust’s assets will likely change and you will not be able to purchase or redeem shares of the Trust.

Assets for which market quotations are readily available are valued at market value. A security listed or traded on an exchange is valued at its last sales price or official closing price as of the close of the regular trading session on the exchange where the security is principally traded or, if such price is not available, at the last sale price as of the Market Close for such security provided by the CTA. Bank loans are valued at the average of the averages of the bid and ask prices provided to an independent loan pricing service by brokers. Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded. Listed options are valued at the mean between the last bid and ask prices from the exchange on which they are principally traded. Investments in open-end registered investment companies that do not trade on an exchange are valued at the end of day NAV per share. Investments in registered investment companies that trade on an exchange are valued at the last sales price or official closing price as of the close of the regular trading session on the exchange where the security is principally traded.

When a market quotation is not readily available or is deemed unreliable, the Trust will determine a fair value for the relevant asset in accordance with procedures adopted by the Trust’s Board. Such procedures provide, for example, that:

- Exchange-traded securities are valued at the mean of the closing bid and ask.
- Debt obligations are valued using an evaluated price provided by an independent pricing service. Evaluated prices provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect factors such as institution-size trading in similar groups of securities, developments related to specific securities, benchmark yield, quality, type of issue, coupon rate, maturity individual trading characteristics and other market data.
- Securities traded in the over-the-counter market are valued based on prices provided by independent pricing services or market makers.
- Options not listed on an exchange are valued by an independent source using an industry accepted model, such as Black-Scholes.
- Centrally cleared swap agreements are valued using a price provided by the central counterparty clearinghouse.
- Over-the-counter swap agreements are valued using a price provided by an independent pricing service.
- Forward foreign currency exchange contracts are valued utilizing current and forward rates obtained from an independent pricing service. Such prices from the third party pricing service are for specific settlement periods and the Trust’s forward foreign currency exchange contracts are valued at an interpolated rate between the closest preceding and subsequent period reported by the independent pricing service.
- Securities for which market prices are not provided by any of the above methods may be valued based upon quotes furnished by brokers.

The prospectuses of the open-end registered investment companies in which the Trust may invest explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

Foreign securities’ (including forward foreign currency exchange contracts) prices are converted into U.S. dollar amounts using the applicable exchange rates as of Market Close. If market quotations are available and believed to be reliable for foreign exchange-traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before Market Close, closing market quotations may become unreliable. An

HOW SHARES ARE PRICED *(continued)*

independent pricing service determines the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current value as of Market Close. Foreign securities' prices meeting the approved degree of certainty that the price is not reflective of current value will be valued by the independent pricing service using pricing models designed to estimate likely changes in the values of those securities between the times in which the trading in those securities is substantially completed and Market Close. Multiple factors may be considered by the independent pricing service in determining the value of such securities and may include information relating to sector indices, American Depositary Receipts and domestic and foreign index futures.

All other assets for which market quotations are not readily available or became unreliable (or if the above fair valuation methods are unavailable or determined to be unreliable) are valued at fair value as determined in good faith by or under the supervision of the Board following procedures approved by the Board. Issuer specific events, transaction price, position size, nature and duration of restrictions on disposition of the security, market trends, bid/ask quotes of brokers and other market data may be reviewed in the course of making a good faith determination of a security's fair value. Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic conditions, interest rates, investor perceptions and market liquidity. Because of the inherent uncertainties of fair valuation, the values used to determine the Trust's NAV may materially differ from the value received upon actual sale of those investments. Thus, fair valuation may have an unintended dilutive or accretive effect on the value of shareholders' investments in the Trust.

ACCOUNT POLICIES

Account Access

Unless your Trust Common Shares are held through a third-party fiduciary or in an omnibus registration at your bank or brokerage firm, you will be able to access your account information over the Internet at www.voyainvestments.com or via a touch tone telephone by calling 1-800-336-3436. Should you wish to speak with a Shareholder Services Representative, you may call the toll-free number listed above.

Privacy Policy

The Trust has adopted a policy concerning investor privacy. To review the privacy policy, contact a Shareholder Services Representative at 1-800-336-3436, obtain a policy over the Internet at www.voyainvestments.com, or see the privacy promise that accompanies any Prospectus obtained by mail.

Householding

To reduce expenses, we may mail only one copy of the Trust's Prospectus and each annual and semi-annual shareholder report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call a Shareholder Services Representative at 1-800-336-3436 or speak to your investment professional. We will begin sending you individual copies 30 days after receiving your request.

INVESTMENT MANAGEMENT AND OTHER SERVICE PROVIDERS

The business and affairs of the Trust, including supervision of the duties performed by the Trust's Adviser and Sub-Adviser, are managed under the direction of the Board. The names and business addresses of the Trustees and Officers of the Trust and their principal occupations and other affiliations during the past five years are set forth under "Management of the Trust" in the SAI.

The Investment Adviser

Voya Investments, an Arizona limited liability company, serves as the investment adviser to the Trust. Voya Investments has overall responsibility for the management of the Trust. Voya Investments oversees all investment advisory and portfolio management services and assists in managing and supervising all aspects of the general day-to-day business activities and operations of the Trust, including custodial, transfer agency, dividend disbursing, accounting, auditing, compliance and related services. Voya Investments is registered with the SEC as an investment adviser.

The Adviser is an indirect, wholly-owned subsidiary of Voya Financial, Inc. Voya Financial, Inc. is a U.S.-based financial institution whose subsidiaries operate in the retirement, investment, and insurance industries.

Voya Investments' principal office is located at 7337 East Doubletree Ranch Road, Suite 100, Scottsdale, Arizona 85258. As of March 31, 2020, Voya Investments managed approximately \$73.8 billion in assets.

Management Fee

The Adviser bears the expenses of providing the services described above. The Adviser currently receives from the Trust an annual fee of 1.05% of the Trust's Managed Assets.

The Adviser is responsible for all of its own costs, including costs of its personnel required to carry out its duties.

For information regarding the basis for the Board's approval of the investment advisory and investment sub-advisory relationships, please refer to the Trust's annual shareholder report dated February 29, 2020.

The Sub-Adviser and Portfolio Managers

The Adviser has engaged a sub-adviser to provide the day-to-day management of the Trust's portfolio. The sub-adviser is an affiliate of the Adviser. The Adviser is responsible for monitoring the investment program and performance of the sub-adviser. Under the terms of the sub-advisory agreement, the agreement can be terminated by either the Adviser or the Board. In the event the sub-advisory agreement is terminated, the sub-adviser may be replaced subject to any regulatory requirements or the Adviser may assume day-to-day investment management of the Trust.

Voya Investment Management Co. LLC

Voya IM, a Delaware limited liability company, was founded in 1972 and is registered with the SEC as an investment adviser. Voya IM is an indirect, wholly-owned subsidiary of Voya Financial, Inc. and is an affiliate of the Adviser. Voya IM has acted as adviser or sub-adviser to mutual funds since 1994 and has managed institutional accounts since 1972. Voya IM's principal office is located at 230 Park Avenue, New York, New York, 10169. As of March 31, 2020, Voya IM managed approximately \$109.4 billion in assets.

The Sub-Adviser currently receives an annual fee, paid by the Adviser, of 0.36% of the Trust's Managed Assets.

Portfolio Management. The following individuals jointly share responsibility for the day-to-day management of the Trust's portfolio.

Jeffrey A. Bakalar, Portfolio Manager since 2000, Managing Director and Group Head of the Voya IM Senior Loan Group, since January 2000.

Charles Lemieux, CFA, Portfolio Manager since 2000 and Senior Vice President of the Voya IM Senior Loan Group, since 1998.

Daniel A. Norman, Portfolio Manager since 2000, Managing Director and Group Head of the Voya IM Senior Loan Group, since January 2000.

Additional Information Regarding the Portfolio Managers

The SAI provides additional information about each portfolio manager's compensation, other accounts managed by each portfolio manager, and each portfolio manager's ownership of securities in the Trust.

INVESTMENT MANAGEMENT AND OTHER SERVICE PROVIDERS *(continued)*

The Transfer Agent, Dividend Disbursing Agent, and Registrar

BNY Mellon Investment Servicing (US) Inc. (“Transfer Agent”) serves as the transfer agent, dividend disbursing agent, and registrar for the Common Shares of the Trust. Its principal office is located at 301 Bellevue Parkway, Wilmington, Delaware 19809.

The Custodian

The Trust’s securities and cash are held and maintained under a Custody Agreement with State Street Bank and Trust Company (“Custodian”). Its principal office is located at 801 Pennsylvania Avenue, Kansas City, Missouri 64105.

The Distributor

Pursuant to the terms of a distribution agreement (“Distribution Agreement”), Voya Investments Distributor, LLC will act as the Trust’s distributor for the optional cash investments under the Trust’s Shareholder Reinvestment Program and for privately negotiated transactions. The Distribution Agreement provides that the Distributor does not receive compensation or commissions from the Trust for such services. In addition, no fees or commissions will be paid by the Trust or its shareholders in connection with the reinvestment of dividends and capital gains distributions. The Distributor is a Delaware limited liability company with its principal offices at 7337 East Doubletree Ranch Road, Suite 100, Scottsdale, Arizona 85258. The Distributor is an indirect, wholly-owned subsidiary of Voya Financial, Inc. and is an affiliate of the Adviser. See “Principal Underwriter” in the SAI.

The Trust bears the expenses of issuing the Common Shares. These expenses include, but are not limited to, the expense of preparation and printing of the Prospectus and SAI, the expense of counsel and independent registered public accounting firm, and others.

The Distributor is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). To obtain information about FINRA member firms and their associated persons, you may contact FINRA at www.finra.org or the Public Disclosure Hotline at 800-289-9999.

Contractual Arrangements

The Trust has contractual arrangements with various service providers, which may include, among others, investment advisers, distributors, custodians and fund accounting agents, shareholder service providers, and transfer agents, who provide services to the Trust. Shareholders are not parties to, or intended (“third-party”) beneficiaries of, any of those contractual arrangements, and those contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce them against the service providers or to seek any remedy under them against the service providers, either directly or on behalf of the Trust. This paragraph is not intended to limit any rights granted to shareholders under federal or state securities laws.

DIVIDENDS AND DISTRIBUTIONS

Distribution Policy

Income dividends are declared and paid monthly. Income dividends consist of interest accrued and amortization of fees earned, less any amortization of premiums paid and the estimated expenses of the Trust, including fees payable to the Adviser. Income dividends are calculated monthly under guidelines approved by the Trustees. Each dividend is payable to shareholders of record on the 10th day of the following month (unless it is a holiday, in which case the next business day is the record date). Accrued amounts of fees received, including facility fees, will be taken in as income and passed on to shareholders as part of dividend distributions. Any fees or commissions paid to facilitate the sale of portfolio Senior Loans in connection with tender offers or other portfolio transactions may reduce the dividend yield.

Capital gains, if any, are declared and paid annually. Because the Trust currently has capital loss carryforwards, it is not anticipated that distributions of net realized capital gains, which may be short- or long-term, will be made for the foreseeable future.

Dividend Reinvestment

Unless you instruct the Trust to pay you dividends in cash, dividends and distributions paid by the Trust will be reinvested in additional Common Shares of the Trust. You may request to receive dividends in cash at any time by giving the Transfer Agent written notice or by contacting the Voya's Shareholder Services Department at 1-800-336-3436.

PLAN OF DISTRIBUTION

Shareholder Reinvestment Program

The following is a summary of the Shareholder Reinvestment Program (“Program”). Shareholders are advised to review a fuller explanation of the Program contained in the Trust’s SAI.

Common Shares are offered by the Trust through the Program. The Program allows participating shareholders to reinvest all dividends (“Dividends”) in additional Common Shares of the Trust and also allows participants to purchase additional Common Shares through optional cash investments in amounts ranging from a minimum of \$100 to a maximum of \$100,000 per month.

The Trust and the Distributor reserve the right to reject any purchase order. Please note that cash, traveler’s checks, third-party checks, money orders, and checks drawn on non-U.S. banks (even if payment may be effected through a U.S. bank) generally will not be accepted.

Common Shares will be issued by the Trust under the Program when the Trust’s Common Shares are trading at a premium to NAV. If the Trust’s Common Shares are trading at a discount to NAV, Common Shares issued under the Program will be purchased on the open market. Common Shares issued under the Program directly from the Trust will be acquired at the greater of: (i) NAV at the close of business on the day preceding the relevant investment date; or (ii) the average of the daily market price of the Common Shares during the pricing period minus a discount of 5% for reinvested Dividends and 0% to 5% for optional cash investments. Common Shares issued under the Program, when shares are trading at a discount to NAV, will be purchased in the market by the Transfer Agent at market price. Shares issued by the Trust under the Program will be issued without a fee or a commission.

Shareholders may elect to participate in the Program by telephoning the Trust or submitting a completed Participation Form to the Transfer Agent, the Program administrator. The Transfer Agent will credit to each participant’s account funds it receives from: (i) Dividends paid on Trust shares registered in the participant’s name; and (ii) optional cash investments. The Transfer Agent will apply all Dividends and optional cash investments received to purchase Common Shares as soon as practicable beginning on the relevant investment date (as described below) and not later than six business days after the relevant investment date, except when necessary to comply with applicable provisions of the federal securities laws. For more information on the Trust’s distribution policy, see “Dividends and Distributions.”

In order for participants to purchase shares through the Program in any month, the Program administrator must receive from the participant any optional cash investment by the relevant investment date. The relevant investment date will be set in advance by the Trust, upon which optional cash investments are first applied by the Transfer Agent to the purchase of Common Shares. Participants may obtain a schedule of relevant dates, including investments dates, the dates by which optional cash investment payments must be received and the dates in which shares will be paid, by calling Voya’s Shareholder Services Department at 1-800-336-3436.

Participants will pay a *pro rata* share of brokerage commissions with respect to the Transfer Agent’s open market purchases in connection with the reinvestment of Dividends or purchases made with optional cash investments.

The Program is intended for the benefit of investors in the Trust. The Trust reserves the right to exclude from participation, at any time: (i) persons or entities who attempt to circumvent the Program’s standard \$100,000 maximum by accumulating accounts over which they have control; or (ii) any other persons or entities as determined in the sole discretion of the Trust.

Currently, persons who are not shareholders of the Trust may not participate in the Program. The Board may elect to change this policy at a future date and permit non-shareholders to participate in the Program. Shareholders may request to receive their Dividends in cash at any time by giving the Transfer Agent written notice or by contacting Voya’s Shareholder Services Department at 1-800-336-3436. Shareholders may elect to close their account at any time by giving the Transfer Agent written notice. When a participant closes their account, the participant, upon request, will receive a certificate for full Common Shares in the account. Fractional Common Shares will be held and aggregated with other fractional Common Shares being liquidated by the Transfer Agent as agent of the Program and paid for by check when actually sold.

The automatic reinvestment of Dividends does not affect the tax characterization of the Dividends (*i.e.*, capital gain distributions and income distributions are subject to tax even though cash is not received). A shareholder whose Dividends are reinvested in shares under the Program will be treated as having received a Dividend equal to either: (i) if shares are issued under the Program directly by the Trust, generally the fair market value of the shares issued to the shareholder;

PLAN OF DISTRIBUTION *(continued)*

or (ii) if reinvestment is made through open market purchases, the amount of cash allocated to the shareholder for the purchase of shares on its behalf in the open market. If a shareholder purchases additional shares for cash at a discount, the shareholder's basis in the shares will be the price he or she paid.

Additional information about the Program may be obtained by contacting Voya's Shareholder Services Department at 1-800-336-3436.

Privately Negotiated Transactions

The Common Shares may also be offered pursuant to privately negotiated transactions between the Trust and the Distributor and specific investors. Generally, such investors will be sophisticated institutional investors. The terms of such privately negotiated transactions will be subject to the discretion of the management of the Trust. In determining whether to sell Common Shares pursuant to a privately negotiated transaction, the Trust will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the person seeking to purchase the Common Shares.

Common Shares issued by the Trust in connection with privately negotiated transactions will be issued at the greater of: (i) NAV per Common Share of the Trust's Common Shares; or (ii) at a discount ranging from 0% to 5% of the average of the daily market price of the Trust's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The discount to apply to such privately negotiated transactions will be determined by the Trust with regard to each specific transaction. The Trust will not pay any commissions with regard to privately negotiated transactions, but an investor may be subject to a front-end sales load of up to 3% paid to or retained by a third party broker-dealer through which such transaction may be effected.

Use of Proceeds

It is expected that 100% of the net proceeds of Common Shares issued pursuant to the Program and privately negotiated transactions will be invested in accordance with the Trust's investment objective and policies within a period of three months. Pending such investment, all or a material portion of the proceeds may be used to pay down the Trust's outstanding borrowings under its credit facilities. See "Investment Objective and Policies - Policy on Borrowing."

As of June 5, 2020 the Trust had \$239.6 million in outstanding borrowings under one credit facility. The interest rate on the Trust's borrowings through this credit facility is LIBOR +0.90% and the maturity date of such borrowings is July 17, 2020. By paying down the Trust's borrowings, the Trust can avoid adverse impacts on yields pending investment of such proceeds in Senior Loans. As investment opportunities are subsequently identified, it is expected that the Trust will reborrow amounts previously repaid and invest such amounts in additional Senior Loans.

DESCRIPTION OF THE TRUST

The Trust is an unincorporated business trust established under the laws of the Commonwealth of Massachusetts by an Agreement and Declaration of Trust dated December 2, 1987, as amended (“Declaration of Trust”). The Board is responsible for protecting the interests of shareholders. The Trustees are experienced executives who oversee the Trust’s activities, review contractual arrangements with companies that provide services to the Trust, and review the Trust’s performance.

The Declaration of Trust provides that the Trustees of the Trust may authorize separate classes of shares of beneficial interest. The Trustees have authorized an unlimited number of shares of beneficial interest, without par value, all of which were initially classified as Common Shares. The Declaration of Trust also authorizes the creation of an unlimited number of shares of beneficial interest with preference rights, including preferred shares, without par value, in one or more series, with rights as determined by the Board, by action of the Board without the approval of the shareholders. The following table shows the number of: (i) shares authorized; (ii) shares held by the Trust for its own account; and (iii) shares outstanding, for each class of authorized securities of the Trust as of June 5, 2020.

Title of Class	Number Authorized	Number Held By the Trust for its Own Account	Number Outstanding
Common Shares	Unlimited	0	175,156,127.300

The Common Shares outstanding are fully paid and nonassessable by the Trust. Holders of Common Shares are entitled to share equally in Dividends declared by the Board payable to holders of Common Shares and in the net assets of the Trust available for distribution to holders of Common Shares after payment of the preferential amounts payable to holders of any outstanding Preferred Shares. Neither holders of Common Shares nor holders of Preferred Shares have pre-emptive or conversion rights and Common Shares are not redeemable. Upon liquidation of the Trust, after paying or adequately providing for the payment of all liabilities of the Trust and the liquidation preference with respect to any outstanding Preferred Shares and, upon receipt of such releases, indemnities and refunding agreements as they deem necessary for their protection, the Trustees may distribute the remaining assets of the Trust among the holders of the Common Shares. Under the rules of the NYSE applicable to listed companies, the Trust is required to hold an annual meeting of shareholders in each year. If the Trust is converted to an open-end investment company or if for any other reason Common Shares are no longer listed on the NYSE (or any other national securities exchange the rules of which require annual meetings of shareholders), the Trust does not intend to hold annual meetings of shareholders.

The Trust is responsible for paying all the expenses of its operations, including, without limitation, the management fee payable and extraordinary expenses, such as litigation expenses.

Under Massachusetts law, shareholders, including holders of Preferred Shares could, under certain circumstances, be held personally liable for the obligations of the Trust. However, the Declaration of Trust disclaims shareholder liability based solely on his or her being or having been a shareholder of the Trust and requires that notice of such disclaimer be given in each agreement, obligation, or instrument entered into or executed by the Trust or the Trustees. The Declaration of Trust provides for indemnification, out of Trust property, for all loss and expense of any shareholder held personally liable for the obligations of the Trust. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Trust would be unable to meet its obligations.

Holders of Common Shares are entitled to one vote for each share held and will vote with the holders of any outstanding Preferred Shares on each matter submitted to a vote of holders of Common Shares, except as described under “Description of the Capital Structure - Preferred Shares.”

Shareholders are entitled to one vote for each share held.

So long as any Preferred Shares are outstanding, holders of Common Shares will not be entitled to receive any dividends of, or other distributions from, the Trust, unless at the time of such declaration: (i) all accrued dividends on preferred shares or accrued interest on borrowings has been paid; and (ii) the value of the Trust’s total assets (determined after deducting the amount of such dividend or other distribution), less all liabilities and indebtedness of the Trust not represented by senior securities, is at least 300% of the aggregate amount of such securities representing indebtedness and at least 200% of the aggregate amount of securities representing indebtedness plus the aggregate liquidation value of the outstanding preferred shares (expected to equal the aggregate original purchase price of the outstanding preferred shares plus redemption premium, if any, together with any accrued and unpaid dividends thereon, whether

DESCRIPTION OF THE TRUST *(continued)*

or not earned or declared and on a cumulative basis). In addition to the requirements of the 1940 Act, the Trust is required to comply with other asset coverage requirements as a condition of the Trust obtaining a rating of the Preferred Shares from a rating agency. These requirements include an asset coverage test more stringent than under the 1940 Act.

The Trust will send unaudited reports at least semi-annually and audited financial statements annually to all of its shareholders.

The Declaration of Trust further provides that obligations of the Trust are not binding upon Trustees individually, but only upon the property of the Trust and that the Trustees will not be liable for any neglect or wrongdoing of any officer, agency, employee, manager or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee, but nothing in the Declaration of Trust protects a Trustee against any liability to which he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his or her office.

Conversion to Open-End Fund

The Trustees may at any time propose conversion of the Trust to an open-end management investment company depending upon their judgment as to the advisability of such action in light of circumstances then prevailing. In considering whether to submit an open-ending proposal to shareholders, the Trustees might consider, among other factors, the differences in operating expenses between open-end and closed-end funds (due to the expenses of continuously selling shares and of standing ready to effect redemptions), the potentially adverse tax consequences to non-redeeming shareholders once a fund is open-ended, and the impact of open-ending on portfolio management policies. Such a conversion would require the approval of both a majority of the Trust's outstanding Common Shares and Preferred Shares voting together as a single class and a majority of the outstanding Preferred Shares voting as a separate class on such conversion. Conversion of the Trust to an open-end investment company would require the redemption of all outstanding Preferred Shares, which would eliminate the leveraged capital structure of the Trust with respect to the Common Shares. A delay in conversion could result following shareholder approval due to the Trust's inability to redeem the Preferred Shares. Shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their next computed NAV less any redemption charge as might be in effect at the time of redemption. If the Trust is converted to an open-end management investment company, it could be required to liquidate portfolio securities to meet requests for redemption and its shares would no longer be listed on the NYSE. If the Trust were to experience significant redemptions as an open-end fund, the decrease in total assets could result in a higher expense ratio and inefficiencies in portfolio management. In this regard, the Trust could reserve the right to effect redemptions in-kind with portfolio securities, which would subject redeeming shareholders to transaction costs in liquidating those securities.

Repurchase of Common Shares

In recognition of the possibility that the Trust's Common Shares may trade at a discount to their NAV, the Trust may, from time to time, take action to attempt to reduce or eliminate a market value discount from NAV by repurchasing its Common Shares in the open market or by tendering its Common Shares at NAV. So long as any Preferred Shares are outstanding, the Trust may not purchase, redeem, or otherwise acquire any Common Shares unless: (i) all accumulated dividends on the Preferred Shares have been paid or set aside for payment through the date of such purchase, redemption, or other acquisition; and (ii) at the time of such purchase, redemption, or acquisition, asset coverage requirements set forth in the Declaration of Trust and the Trust's Certificate of Designation for Preferred Shares are met. Repurchases of Common Shares may result in the Trust being required to redeem Preferred Shares to satisfy asset coverage requirements.

Fundamental and Non-Fundamental Investment Policies of the Trust

The investment objective of the Trust, certain policies of the Trust specified herein as fundamental, and the investment restrictions of the Trust described in the SAI are fundamental policies of the Trust and may not be changed without a majority vote of the shareholders of the Trust. The term majority vote means the affirmative vote of: (i) more than 50% of the outstanding shares of the Trust; or (ii) 67% or more of the shares present at a meeting if more than 50% of the outstanding shares of the Trust are represented at the meeting in person or by proxy, whichever is less. All other policies of the Trust may be modified by resolution of the Board.

DESCRIPTION OF THE CAPITAL STRUCTURE

Common Shares

The Trust's Declaration of Trust authorizes the issuance of an unlimited number of Common Shares of beneficial interest, without par value. All Common Shares have equal rights to the payment of dividends and the distribution of assets upon liquidation. Common Shares will, when issued, be fully paid and non-assessable and will have no pre-emptive or conversion rights or rights to cumulative voting.

Whenever Preferred Shares are outstanding, holders of Common Shares will not be entitled to receive any distributions from the Trust, unless at the time of such declaration: (i) all accrued dividends on Preferred Shares or accrued interest on borrowings have been paid; and (ii) the value of the Trust's total assets (determined after deducting the amount of such dividend or other distribution), less all liabilities and indebtedness of the Trust not represented by senior securities, is at least 300% of the aggregate amount of such securities representing indebtedness and at least 200% of the aggregate amount of securities representing indebtedness plus the aggregate liquidation value of the outstanding Preferred Shares. In addition to the requirements of the 1940 Act, the Trust would be required to comply with other asset coverage requirements as a condition of the Trust obtaining a rating of the Preferred Shares from a rating agency. These requirements include asset coverage tests more stringent than under the 1940 Act. See "Description of the Capital Structure - Preferred Shares."

Borrowings

The Trust's Declaration of Trust authorizes the Trust, without the prior approval of holders of Common Shares, to borrow money. In this connection, the Trust may issue notes or other evidence of indebtedness (including bank borrowings or commercial paper) and may secure any such borrowings by mortgaging, pledging, or otherwise granting a security interest in the Trust's assets. See "Risk Factors and Special Considerations."

Preferred Shares

The Trust's Declaration of Trust authorizes the issuance of an unlimited number of shares of a class of beneficial interest with preference rights, including Preferred Shares as may be authorized from time to time by the Trustees, in one or more series, with rights as determined by the Board, by action of the Board without the approval of the holders of Common Shares or other series of outstanding Preferred Shares. The Preferred Shares will have such preferences, voting powers, terms of redemption, if any, and special or relative rights or privileges (including conversion rights, if any) as the Board may determine and would be set forth in the Trust's Certificate of Designation establishing the terms of the Preferred Shares.

Any decision to offer Preferred Shares is subject to market conditions and to the Board and the Adviser's or Sub-Adviser's continuing belief that leveraging the Trust's capital structure through the issuance of Preferred Shares is likely to achieve the benefits to the Common Shares described in this Prospectus for long-term investors. The terms of the Preferred Shares will be determined by the Board in consultation with the Adviser or Sub-Adviser (subject to applicable law and the Trust's Declaration of Trust) if and when it authorizes a Preferred Shares offering.

Under the 1940 Act, the Trust is permitted to have outstanding, more than one series of Preferred Shares as long as no single series has priority over another series nor holders of Preferred Shares have pre-emptive rights to purchase any other Preferred Shares that might be issued.

The Preferred Shares would have complete priority over the Common Shares as to distribution of assets. In the event of any voluntary or involuntary liquidation, dissolution, or winding up of the affairs of the Trust, holders of Preferred Shares would be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to holders of Common Shares.

Litigation

On May 1, 2020, Saba Capital CEF Opportunities 1 Ltd. ("Saba") filed a Verified Complaint and an Application for Preliminary Injunction in a state court in Phoenix, Arizona, naming as defendants the Trust, the Adviser, and the individuals serving on the Trust's Board of Trustees. Saba sought a preliminary injunction and permanent equitable relief from the court, primarily in the form of an order striking certain amendments to the Trust's bylaws which related to the voting standard to be employed at Board of Trustee elections, as adopted by the Board of Trustees on April 13, 2020, and awarding various other forms of declaratory and unspecified monetary relief. Defendants filed a Motion to Dismiss the Verified Complaint and an Opposition to Saba's Application for Preliminary Injunction on May 20, 2020. On June

DESCRIPTION OF THE CAPITAL STRUCTURE *(continued)*

26, 2020, after a hearing, the court granted Saba's application for a preliminary injunction, ruling that the named defendants are preliminarily enjoined from applying the voting standard set forth in the April 13, 2020, bylaw amendments, and that the Trust shall conduct the Board of Trustee election in accordance with the previous voting standard.

TAX MATTERS

The following information is meant as a general summary for U.S. shareholders. Please see the SAI for additional information. Investors should rely on their own tax adviser for advice about the particular federal, state, and local tax consequences to them of investing in the Trust.

The Trust will distribute all or substantially all of its net investment income and net realized capital gains, if any, to its shareholders each year. Although the Trust will not be taxed on amounts it distributes, most shareholders will be taxed on amounts they receive. A particular distribution generally will be taxable as either ordinary income or long-term capital gain. It generally does not matter how long a shareholder has held the Trust's Common Shares or whether the shareholder elects to receive distributions in cash or reinvest them in additional Common Shares. For example, if the Trust properly reports a particular distribution as a capital gain dividend, it will be taxable to a shareholder at his or her long-term capital gains rate.

Dividends from the Trust are not expected to be eligible for the reduced rate of tax that may apply to distributions attributable to certain qualifying dividends on corporate stocks. Distributions attributable to non-qualifying dividends, interest income, other types of ordinary income, and short-term capital gains will be taxed at the ordinary income tax rate applicable to the shareholder.

Dividends declared by the Trust and payable to shareholders of record in October, November, or December and paid during the following January will be treated as having been received by shareholders in the year the distributions were declared.

Each shareholder will receive an annual statement summarizing the shareholder's dividend and capital gains distributions.

If a shareholder invests through a tax-advantaged account such as a retirement plan, the shareholder generally will not have to pay tax on dividends, at least until they are distributed from the account. These accounts are subject to complex tax rules and shareholders should consult a tax adviser about investment through a tax-advantaged account.

There may be tax consequences to a shareholder if the shareholder sells the Trust's Common Shares. A shareholder will generally have a capital gain or loss, which will be long-term or short-term, generally depending on how long the shareholder has held those Common Shares. If a shareholder exchanges shares, the shareholder may be treated as if he or she sold them. Any capital loss incurred on the sale or exchange of Trust shares held for six months or less will be treated as long-term loss to the extent of capital gain dividends received with respect to such shares. Additionally, any loss realized on a sale, redemption, or exchange of shares of the Trust may be disallowed under "wash sale" rules to the extent the shares disposed of are replaced with other shares of the Trust within a period of 61 days beginning 30 days before and ending 30 days after the shares are disposed of, including pursuant to the Program. If disallowed, the loss will be reflected as an adjustment to the tax basis of the shares acquired. You are responsible for any tax liabilities generated by your transactions.

The Trust generally is required to withhold U.S. federal income tax on all taxable distributions payable to a shareholder if the shareholder fails to provide the Trust with his or her correct taxpayer identification number or to make required certifications, or if the shareholder has been notified by the Internal Revenue Service ("IRS") that he or she is subject to backup withholding. Backup withholding is not an additional tax; rather, it is a way in which the IRS ensures it will collect taxes otherwise due. Any amounts withheld may be credited against a shareholder's U.S. federal income tax liability.

The IRS requires mutual fund companies and brokers to report on Form 1099-B the cost basis on the sale or exchange of Trust shares acquired on or after January 1, 2012 ("covered shares"). If you acquire and hold shares directly through the Trust and not through a financial intermediary, the Trust will use an average cost single category methodology for tracking and reporting your cost basis on covered shares, unless you request, in writing, another cost basis reporting methodology. Information regarding the methods available for cost basis reporting is included in the SAI.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Trust and net gains from redemptions, sales, exchanges or other taxable dispositions of Trust shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

MORE INFORMATION ABOUT THE TRUST

Legal Matters

The validity of the Common Shares offered hereby will be passed upon for the Trust by Ropes & Gray LLP, Prudential Tower, 800 Boylston Street, Boston MA 02199-3600, counsel to the Trust.

Independent Registered Public Accounting Firm

Ernst & Young LLP serves as the independent registered public accounting firm for the Trust. The principal address of Ernst & Young LLP is 200 Clarendon Street, Boston, Massachusetts 02116 .
