FUND SUMMARY — USCF ALUMINUM STRATEGY FUND

Investment Objective

The USCF Aluminum Strategy Fund (the “Fund”) seeks investment results that generally correspond over the long term to the performance of the price of aluminum.

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. **Investors may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table or example below.** The fees and expenses are expressed as a percentage of the Fund’s average daily net assets.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees ⁽¹⁾	0.65%
Other Expenses ⁽²⁾	0.00%
Total Annual Fund Operating Expenses	0.65%

⁽¹⁾ The Fund pays USCF Advisers LLC (the “Adviser”) an annual unitary management fee based upon the Fund’s average daily net assets at the rate set forth above. The Adviser is responsible for all direct expenses of the Fund, including the costs of investing in the Subsidiary (as defined below) except expenses for taxes and governmental fees; brokerage fees; commissions and other transaction expenses; costs of borrowing money, including interest expenses; securities lending expenses; extraordinary expenses (such as litigation and indemnification expenses); and fees and expenses of any independent legal counsel.

⁽²⁾ Other Expenses are based on estimated amounts for the current fiscal year.

Example

The following example is intended to help investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then sell all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% per year and that operating expenses remain the same. This example does not include the brokerage commissions that investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years
\$66	\$238

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities or financial instruments (or “turns over” its portfolio). A higher portfolio turnover rate will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund’s performance. Importantly, this rate excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s shares. The Fund is newly organized and, as a result, no portfolio turnover information is available as of the date of this Prospectus.

Principal Investment Strategies of the Fund

The Fund is an actively managed exchange-traded fund (“ETF”). The Fund seeks to achieve its investment objective by using a proprietary methodology that seeks to provide exposure to the price of aluminum through aluminum-based derivatives investments (“Aluminum Derivatives”). The Fund will primarily invest in aluminum futures, however, in order to gain the desired economic exposure, the Fund may also invest in cash settled options, forward contracts, options on futures contracts, and other options. The Fund may invest in Aluminum Derivatives that are traded on U.S. and non-U.S. exchanges. The Fund does not seek to track any specific benchmark or index.

Aluminum may be physically traded at its current market price (or spot price), but is more commonly traded through the purchase and sale of futures contracts (*i.e.*, agreements to buy or sell a specific quantity of aluminum in the future at a specific price). The Fund will invest in aluminum only through its investments in derivative instruments such as futures contracts, and not directly. Futures contracts expire by default on a monthly basis. The Fund will sell the futures contracts it holds as they near expiration and will replace them with new futures contracts with a later expiration date. This is often referred to as “rolling” a futures contract.

Although the Fund is permitted to invest in Aluminum Derivatives directly, the Fund intends to invest in Aluminum Derivatives primarily through a wholly-owned subsidiary of the Fund incorporated in the Cayman Islands, USCF Cayman Commodity 8 (the “Subsidiary”). By investing in the Subsidiary, the Fund is able to obtain greater exposure to aluminum while maintaining compliance with U.S. federal income tax requirements applicable to investment companies. The Fund will not invest more than 25% of its total assets in the Subsidiary, as determined at the end of each fiscal quarter.

The Subsidiary is advised by the Adviser and has the same investment objective as the Fund. The assets of the Subsidiary are subject to the same investment restrictions and limitations, and follow the same compliance policies and procedures, as the Fund, except that the Subsidiary may invest without limitation in Aluminum Derivatives. The Subsidiary’s investments are considered to be part of the Fund’s portfolio. Neither the Fund nor the Subsidiary invests directly in aluminum or other commodities.

The portion of the Fund’s assets that are not invested in Aluminum Derivatives will be primarily invested, directly or indirectly through the Subsidiary, in cash, cash equivalents, investment grade fixed-income investments, money market funds, repurchase agreements or a combination thereof. The primary purpose of such investments will be to meet coverage and collateral requirements associated with the Fund’s Aluminum Derivatives.

The Fund is not “diversified,” as that term is defined in the Investment Company Act of 1940, as amended (the “1940 Act”).

The CFTC has adopted certain requirements that subject a registered investment company and its investment adviser to regulation by the CFTC if the registered investment company invests more than a prescribed level of its net asset value (“NAV”) in CFTC-regulated futures, options, or swaps, or if the registered investment company markets itself as providing investment exposure to such instruments. Due to the Fund’s expected use of such CFTC-regulated instruments above the prescribed levels, the Fund is considered a “commodity pool” under the Commodity Exchange Act (“CEA”).

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The principal risks of investing in the Fund are summarized below.

Commodities Risk. Exposure to the commodities markets through investments in Aluminum Derivatives may subject the Fund to greater volatility than investments in traditional securities. The risks and hazards that are inherent in commodity production may cause the price of commodities to fluctuate widely. Significant changes in the value of commodities may lead to volatility in the Fund’s NAV and market price.

Aluminum Risk. Aluminum is an industrial metal. Consequently, in addition to factors affecting commodities generally, the price of aluminum may be subject to additional factors. The price of aluminum may be impacted by changes in the level of industrial activity and demand, availability of substitutes, changes in supply, and variations in cost, among other items. Fluctuations in the price of aluminum may lead to volatility in the Fund’s NAV and market value.

Commodity Market Regulatory Risk. The commodities markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and futures exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits, and the suspension of trading. The regulation of commodities transactions (*i.e.*, futures, options and swaps) in the U.S. is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. The effect of any future regulatory change on the Fund is impossible to predict, but it could be substantial and adverse.

Derivatives Risk. The value of a derivative instrument, such as the Fund’s investments in Aluminum Derivatives, depends largely on (and is derived from) an underlying asset (or a reference rate or index). Derivatives create leverage risk because they do not require payment up front equal to the economic exposure created by owning the derivative. As a result, an adverse change in the value of the underlying asset of a derivative could result in the Fund sustaining a loss that is substantially greater than the amount invested in the derivative, which may make the Fund’s returns more volatile and increase the risk of loss. The Fund may not be able to close out a derivative transaction at a favorable time or price,

particularly during adverse market conditions or market disruptions, including periods of increased volatility. Derivatives may also be harder to value, less tax efficient, and subject to changing government regulation that could impact the Fund's ability to use certain derivatives or their cost. Also, derivatives used to gain or limit exposure to a particular market segment may not provide the expected benefits, particularly during adverse market conditions. These risks are greater for the Fund than most other ETFs because the Fund will implement its investment strategy primarily through investments in Aluminum Derivatives, which are derivative instruments.

- **Futures Risk.** Futures are standardized, exchange-traded contracts that obligate a purchaser to take delivery, and a seller to make delivery, of a specific amount of an asset at a specified future date (the expiration date) at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The primary risks associated with the use of futures contracts and options are: (a) the imperfect correlation between the futures contract and the underlying commodity; (b) the possible lack of a liquid secondary market for a futures contract and the resulting inability to close a futures contract when desired; (c) losses caused by unanticipated market movements, which can, in certain instances, be unlimited; and (d) unfavorable execution prices. The Fund may need to sell a futures contract at an inopportune time for an unfavorable price; for example, the Fund is not permitted to take delivery of the underlying commodity, so as a futures contract approaches its expiration date, the contract may be replaced by a similar contract that has a later expiration. This process is referred to as "rolling." If the market for these contracts is in "contango," meaning that the prices of futures contracts in the nearer months are lower than the price of contracts in the distant months, the sale of the near-term month contract would be at a lower price than the longer-term contract, resulting in a cost to "roll" the futures contract. Contango and backwardation (if the price of the near month futures contract is higher than the next futures month contract) may impact the total return on investment in shares of the Fund relative to the spot prices of the commodities on which the Fund holds futures. It is impossible to predict with any degree of certainty whether backwardation or contango will occur in the future. It is likely that both conditions will occur during different periods.
- **Options Risk.** An option is a type of derivative instrument that gives the holder the right (but not the obligation) to buy ("call") or sell ("put") an asset in the future at an agreed upon price prior to the expiration date of the option. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. The value of options can be highly volatile, and their use can result in loss if the Adviser is incorrect in its expectation of price fluctuations.

Authorized Participants Risk. Only certain institutions or large investors (typically, market makers or other broker-dealers) that have entered into an agreement with the Fund's distributor ("Authorized Participants") may purchase or redeem shares at NAV. The Fund's distributor has entered into Authorized Participant Agreements with a limited number of institutions on behalf of the Fund. Should these Authorized Participants cease to act as such or, for any reason, be unable to create or redeem shares of the Fund and new Authorized Participants are not appointed in their place, shares of the Fund may trade at a discount to the Fund's NAV and possibly face delisting.

Cash Management Risk. To the extent the Fund holds cash, the Fund will earn reduced income (if any) on the cash and will be subject to the credit risk of the depository institution holding the cash and any fees imposed on large cash balances. If a significant amount of the Fund's assets are invested in cash and cash equivalents, the Fund may underperform other funds that do not similarly invest in cash and cash equivalents for investment purposes and/or to collateralize derivative instruments.

Cash Transaction Risk. Creation and redemption transactions are expected to generally settle through payments consisting substantially of cash, which will cause the Fund to incur certain costs, such as brokerage and other transaction costs, that it would not incur if it made solely in-kind redemptions. In addition, because the Fund may be required to sell financial instruments in order to obtain the cash needed to fulfill a redemption request from an Authorized Participant, an investment in Fund shares may be less tax efficient than investments in shares of conventional ETFs, and there may be a substantial difference in the after-tax rate of return between the Fund and conventional ETFs.

Commodities Tax Risk. The Fund intends to qualify as a regulated investment company ("RIC") under subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). If it qualifies as a RIC and satisfies certain minimum distribution requirements, the Fund will not be subject to U.S. federal income tax on income and gains that it timely distributes to shareholders. To qualify as a RIC, the Fund must satisfy certain source-of-income requirements. The Internal Revenue Service ("IRS") issued a revenue ruling indicating that certain direct investments in commodity-linked instruments would not produce qualifying income for purposes of the RIC source-of-income requirements. Subsequent to this ruling, the IRS issued an additional revenue ruling and several private letter rulings in which it concluded that certain commodity-linked

instruments and certain investments in foreign subsidiaries holding commodity-linked instruments would produce qualifying income. As discussed above, the Fund intends to gain exposure to the commodities market primarily through its investment in the Subsidiary. The Fund anticipates that its inclusion of income from the Subsidiary in the Fund's taxable income will be treated as qualifying income for purposes of the RIC source-of-income requirements. This tax treatment may be adversely affected by additional changes in legislation, regulations, or other legally binding authority. If, as a result of any such adverse action, the income of the Fund from the Subsidiary is treated as non-qualifying income, the Fund might fail to qualify as a RIC, in which case, it would be subject to U.S. federal income tax at the Fund level. Such adverse effects could, among other consequences, limit the Fund's ability to pursue its investment strategy. The Fund seeks to manage its investment in the Subsidiary and in Aluminum Derivatives as necessary to maintain its qualifications as a RIC.

Fixed Income Investment Risk. When the Fund invests in fixed income instruments, the value of the Fund's investment will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value. Other risk factors associated with fixed income investments include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). The Fund may be subject to a greater risk of rising interest rates as the Federal Reserve continues to increase interest rates after a period of historically low rates.

Fluctuation of NAV Risk. The market prices of the Fund's shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the Fund's shares on the NYSE Arca. The Adviser cannot predict whether the Fund's shares will trade below, at, or above NAV.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions therefore may decline. Inflation may result in losses to Fund shareholders.

Intermediary and Counterparty Risk. Futures and options contracts, and other forms of derivatives, as well as fixed income instruments, involve intermediaries or counterparties and therefore subject the Fund to the risk that an intermediary or counterparty could default on its obligations under an agreement, either through the intermediary's or counterparty's bankruptcy or general failure to perform its obligations. In the event of default, the Fund may not be able to recover its assets. Moreover, even if the Fund is able to recover some or all of its assets, such recovery could involve lengthy delays. During any such period, the Fund may have difficulty determining the value of its investments associated with the intermediary or counterparty, which in turn could result in the overstatement or understatement of the Fund's NAV. This may negatively affect the Fund's share price and may cause the Fund's shares to trade at a premium or discount to NAV. For exchange-traded derivatives, including the Fund's investments in futures contracts, a futures commission merchant ("FCM") serves as the intermediary to the Fund (the FCM, in turn, serves as an intermediary to the applicable clearing organization). In such cases, the Fund faces the risk that the FCM would default on its obligations, including the FCM's obligation to return margin posted by the Fund.

Investing in Other Investment Companies Risk. An investment in other investment companies (including money market funds) is subject to the risks associated with those investment companies. To the extent the Fund invests in other investment companies, the Fund's shareholders will incur certain duplicative fees and expenses, including investment advisory fees. The return on such investments will be reduced by the operating expenses, including investment advisory and administration fees, of such investment companies, and will be further reduced by the Fund's own expenses, including management fees; that is, there will be a layering of certain fees and expenses.

Leverage Risk. Borrowing transactions, derivatives transactions, and other investment transactions may create investment leverage. If the Fund engages in transactions that have a leveraging effect on the Fund's investment portfolio, the value of the Fund will be potentially more volatile and all other risks will tend to be compounded. The use of leverage is considered to be a speculative investment practice and may result in losses to the Fund. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. The use of leverage may cause the Fund to liquidate positions when it may not be advantageous to do so to satisfy repayment, interest payment, or margin obligations or other requirements.

Liquidity Risk. The Fund may not always be able to liquidate its positions at the desired price or time (or at all) or at prices approximating those at which the Fund currently values them. It may be difficult for the Fund to value illiquid holdings accurately. Unexpected market illiquidity may cause major losses at any time.

Long-Term Objective; Not a Complete Investment Program. The Fund is intended for investors seeking exposure to the price of aluminum over the long term. An investment in shares of the Fund should not be considered a complete investment program. Each shareholder should take into account the Fund's investment objectives as well as the shareholder's other investments when considering an investment in the Fund.

Management Risk. The Fund is subject to management risk because its portfolio will be actively managed. The Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Market Risk. The trading prices of commodities and other financial instruments fluctuate, sometimes rapidly and unpredictably, in response to a variety of factors. These factors include events impacting a specific market segment or the entire market, including global pandemics, such as COVID-19. The Fund's NAV and market price may fluctuate significantly due to market risk. The Fund, and investors, could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns, such as a recession. The loss of the entire principal amount of an investment is possible.

New Fund Risk. Since the Fund is new, there can be no assurance that the Fund will grow to or maintain an economically viable size. If a new fund were to fail to successfully implement its investment strategies or achieve its investment objectives, performance may be negatively impacted, and any resulting liquidation could create negative transaction costs for the fund and tax consequences for investors.

Non-Diversification Risk. The Fund will pursue its investment strategy without regard to whether its investment strategy presents adequate diversification among individual holdings. If there are adverse changes in the financial condition of a particular investment, the resulting adverse impact on the performance of the Fund may be more pronounced than if the Fund were more diversified.

Non-U.S. Investment Risk. The Fund may invest in Aluminum Derivatives traded on non-U.S. exchanges. Transactions on non-U.S. exchanges present greater risk to the extent that they are not subject to the same degree of regulation as their U.S. counterparts. Because certain of the Fund's underlying investments trade in markets that are closed when the market in which the Fund's shares are listed for trading is open, there may be changes between the investment's last quote from the closed foreign market and the value of the investment during the Fund's domestic trading day. This may result in differences between the market price of the Fund's shares and the underlying value of the Fund's shares.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and its service providers seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Position Limits Risk. Accountability levels, position limits, and daily price fluctuation limits set by futures exchanges and regulations imposed by the CFTC may prevent the Fund from trading certain futures contracts or employing its investment strategies, which could harm the performance of the Fund.

Close-Out Risk for Qualified Financial Contracts. Regulations adopted by global prudential regulators that are now in effect require counterparties that are part of U.S. or foreign global systemically important banking organizations to include contractual restrictions on close-out and cross-default in agreements relating to qualified financial contracts. Qualified financial contracts include agreements relating to swaps, currency forwards and other derivatives as well as repurchase agreements and securities lending agreements. The restrictions prevent the Fund from closing out a qualified financial contract during a specified time period if the counterparty is subject to resolution proceedings and also prohibit the Fund from exercising default rights due to a receivership or similar proceeding of an affiliate of the counterparty. These requirements may increase credit risk and other risks to the Fund.

Repurchase Agreements Risk. Repurchase agreements are instruments under which the Fund acquires ownership of a security, and the seller, a broker-dealer or a bank agrees to repurchase the security at a mutually agreed upon time and price. Repurchase agreements expose the Fund to the risk that the counterparty defaults on its obligation to repurchase the underlying instruments collateralizing the repurchase agreement. In this circumstance, the Fund could lose money if the underlying instruments used as collateral lose their value before they can be sold.

Secondary Market Risk. Although the Fund's shares are listed for trading on NYSE Arca and may be listed or traded on U.S. and non-U.S. stock exchanges other than NYSE Arca, there can be no assurance that an active trading market for such shares will develop or be maintained. In stressed market conditions, the market for an ETF's shares may become less liquid in response to deteriorating liquidity in the markets for the ETF's underlying portfolio holdings. Further, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's

portfolio securities and the Fund's market price. This reduced liquidity and effectiveness could result in shares trading at a discount to NAV and also in greater than normal intra-day bid-ask spreads for shares. Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers and will incur the cost of the difference between "bid" and "ask" prices of the Fund's shares.

Subsidiary Investment Risk. By investing in the Subsidiary, the Fund will be indirectly exposed to the risks associated with the Subsidiary's investments. There can be no assurance that the investment objective of the Subsidiary will be achieved. The Subsidiary is not registered under the 1940 Act and is not subject to all the investor protections of the 1940 Act. Thus, the Fund, as an investor in the Subsidiary, will not have all the protections afforded to investors in registered investment companies. A shareholder's cost of investing in the Fund may be higher because shareholders bear the expenses of the Subsidiary. In addition, changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary are organized or incorporated, respectively, could result in the inability of the Fund or the Subsidiary to operate as described in this Prospectus and the Statement of Additional Information ("SAI") and could negatively affect the Fund.

Treasuries Risk. The Fund may invest in U.S. government securities or obligations ("Treasuries"). The value of Treasuries generally moves inversely with movements in interest rates. The prices of longer maturity securities are generally subject to greater market fluctuations as a result of changes in interest rates. If the Fund is required to sell Treasuries or other U.S. government obligations at a price lower than the price at which they were acquired, the Fund will experience a loss.

Ukraine War Risk. On February 24, 2022, Russia launched a large-scale invasion of Ukraine. This invasion and sanctions brought by the United States and other countries against Russia have caused disruptions in many business sectors and have resulted in significant market disruptions, including increased volatility in certain commodity prices.

Valuation Risk. The sale price the Fund could receive for a security or other asset may differ from the Fund's valuation of the security or asset, particularly for securities or assets that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities or assets in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

Fund Performance

The Fund is new and therefore does not have a performance history for a full calendar year. Performance information for the Fund will be provided in this section once the Fund has annual returns for a full calendar year. Current performance information is available at www.uscfinvestments.com.

Performance information, when available, will give some indication of the risks of an investment in the Fund by comparing the Fund's performance with a broad measure of market performance. Please remember that the Fund's past performance (before and after taxes) is not necessarily an indication of its future performance and does not guarantee future results. The Fund may perform better or worse in the future.

Management

USCF Advisers, LLC serves as the investment adviser to the Fund and the Subsidiary.

Portfolio Managers

Andrew F Ngim, a Management Director and Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in October 2023.

Darius Coby, Director of Operations and Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in October 2023.

Seth Lancaster, a Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in October 2023.

Buying and Selling Fund Shares

The Fund is an ETF. This means that individual shares of the Fund may only be purchased and sold in the secondary market on a national securities exchange, such as NYSE Arca, through a broker-dealer. The price of the Fund's shares is based on market price. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV

(premium) or less than NAV (discount). When buying or selling shares in the secondary market, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask). This is known as the “bid-ask spread”.

Information about the Fund’s NAV, market price, premiums and discounts, and bid-ask spread is available on the Fund’s website at www.uscfinvestments.com.

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only Authorized Participants that have entered into an agreement with ALPS Distributors, Inc. (the “Distributor”) may purchase or redeem. Creation Units consist of 25,000 shares, though this may change from time to time.

Authorized Participants are required to pay a transaction fee of \$250 to compensate the Fund for brokerage and transaction expenses when purchasing and redeeming Creation Units. See “Transaction Fees on Creation and Redemption Transactions.”

The Fund generally issues and redeems Creation Units in exchange for a designated amount of cash.

Tax Information

The Fund intends to make distributions of ordinary income, qualified dividend income, or capital gains. Shareholders will be subject to U.S. federal income tax on such amounts at the rate applicable to such category of income.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, the support of technology platforms, and/or reporting systems or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INVESTMENT OBJECTIVE, STRATEGY, AND RISK INFORMATION

Investment Objectives

The Fund seeks investment results that generally correspond over the long term to the performance of the price of aluminum.

There can be no assurance that the Fund will achieve its investment objective. Because the Fund’s investment objective has been adopted as a non-fundamental investment policy, the Fund’s investment objective may be changed by the Board without a vote of shareholders upon 60 days’ written notice to the Fund’s shareholders.

Principal Investment Strategies of the Fund

The Fund is an actively managed ETF. The Fund seeks to achieve its investment objective by using a proprietary methodology that seeks to provide exposure to the price of aluminum through Aluminum Derivatives. The Fund will primarily invest in aluminum futures, however, in order to gain the desired economic exposure, the Fund may also invest in cash settled options, forward contracts, options on futures contracts, and other options. The Fund will continue to seek to provide exposure to the price of aluminum, even in adverse market conditions, such as a decrease in the price of aluminum.

The Fund may invest in Aluminum Derivatives that are traded on U.S. and non-U.S. exchanges. The Fund will primarily purchase aluminum futures contracts that are traded on the Chicago Mercantile Exchange (CME), but the Fund may also purchase aluminum futures contracts traded on the London Metal Exchange (LME). The Fund does not seek to track any specific benchmark or index.

Aluminum may be physically traded at its current market price (or spot price), but is more commonly traded through the purchase and sale of futures contracts (*i.e.*, agreements to buy or sell a specific quantity of aluminum in the future at a specific price). The Fund will invest in aluminum only through its investments in derivative instruments such as futures contracts, and not directly. Futures contracts expire by default on a monthly basis. The Fund will sell the futures contracts it holds as they near expiration and will replace them with new futures contracts with a later expiration date. This is often referred to as “rolling” a futures contract.

Although the Fund is permitted to invest in Aluminum Derivatives directly, the Fund intends to invest in Aluminum Derivatives primarily through the Subsidiary. By investing in the Subsidiary, the Fund is able to obtain greater exposure to aluminum while maintaining compliance with U.S. federal income tax requirements applicable to investment companies. The Fund will not invest more than 25% of its total assets in the Subsidiary, as determined at the end of each fiscal quarter.

The Subsidiary is advised by the Adviser and has the same investment objective as the Fund. The assets of the Subsidiary are subject to the same investment restrictions and limitations, and follow the same compliance policies and procedures, as the Fund, except that the Subsidiary may invest without limitation in Aluminum Derivatives. The Subsidiary's investments are considered to be part of the Fund's portfolio. Neither the Fund nor the Subsidiary invests directly in aluminum or other commodities.

The portion of the Fund's assets that are not invested in Aluminum Derivatives will be primarily invested, directly or indirectly through the Subsidiary, in cash, cash equivalents, investment grade fixed-income investments, money market funds, repurchase agreements or a combination thereof. The primary purpose of such investments will be to meet coverage and collateral requirements associated with the Fund's Aluminum Derivatives.

The Fund is not "diversified," as that term is defined in the 1940 Act.

The CFTC has adopted certain requirements that subject a registered investment company and its investment adviser to regulation by the CFTC if the registered investment company invests more than a prescribed level of its NAV in CFTC-regulated futures, options, or swaps, or if the registered investment company markets itself as providing investment exposure to such instruments. Due to the Fund's expected use of such CFTC-regulated instruments above the prescribed levels, the Fund is considered a "commodity pool" under the CEA.

Additional Principal Risk Information about the Fund

This section provides additional information regarding the principal risks described under "Principal Risks of Investing in the Fund" in the Fund Summary. Each risk factor below could have a negative impact on the Fund's performance and trading prices.

Commodities Risk. The value of a commodity is based upon the price movements of the commodity in the market. The risks and hazards that are inherent in commodity production may cause the price of commodities to fluctuate widely. These price changes may be magnified by computer-driven algorithmic trading, which is becoming more prevalent in the commodities markets. Because the Fund has exposure to the commodities markets, developments affecting commodities may have an impact on the Fund. Such developments may include, among other things:

- governmental, agricultural, trade, fiscal, import, monetary, and exchange control programs and policies;
- weather and climate conditions;
- changing supply and demand relationships;
- changes in international balances of payments and trade;
- U.S. and international rates of inflation;
- currency devaluations and revaluations;
- U.S. and international political and economic events;
- changes in interest and foreign currency/exchange rates;
- market liquidity; and
- changes in philosophies and emotions of market participants.

Exposure to the commodities markets through investments in Aluminum Derivatives may subject the Fund to greater volatility than investments in traditional securities. Significant changes in the value of commodities may lead to volatility in the Fund's NAV and market price.

Aluminum Risk. Aluminum is an industrial metal. Consequently, in addition to factors affecting commodities generally, the price of aluminum may be subject to additional factors specific to industrial metals, and in particular aluminum. These factors may include:

- changes in the level of industrial activity using industrial metals, and in particular aluminum, including the availability of substitutes such as man-made or synthetic substitutes;
- changes in demand from China and other economies which have become oversized users of aluminum and risk of economic downturns in such economies;

- geopolitical issues, governmental interference, political turmoil and unrest in countries that mine raw minerals and or produce aluminum;
- disruptions in the supply chain, from mining to storage to smelting or refining;
- adjustments to inventory in response to changes in economic activity and/or pricing levels;
- variations in production costs, including storage, labor and energy costs;
- costs associated with regulatory compliance, including environmental regulations; and
- changes in industrial, government and consumer demand, both in individual consuming nations and internationally.

Recently, the price of aluminum has been volatile. Aluminum prices hit an all-time high in March 2022 due to the post-COVID-19 pandemic global economic recovery, fears of sanctions against Russian entities, tight physical stocks, and supply chain disruptions. Since March 2022, demand has stabilized, however, the ongoing Russia Ukraine conflict and fears of sanctions against Russian entities continue to cause uncertainty in the aluminum markets. For example, in February 2023 the U.S. government imposed new tariffs on Russian aluminum and in May 2023, the U.S. imposed additional trade sanctions against Russia that target goods and services vital to military operations. Fluctuations in the price of aluminum may lead to volatility in the Fund's NAV and market value.

Commodity Market Regulatory Risk. The commodity markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and futures exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits, and the suspension of trading. The regulation of commodity interest transactions (i.e., futures, options and swaps) in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. The effect of any future regulatory change on the Fund is impossible to predict, but it could be substantial and adverse.

The Fund and the Subsidiary are deemed "commodity pools" and the Adviser is considered a "commodity pool operator" with respect to the Fund under the CEA. The Adviser is therefore subject to regulation by the SEC and the CFTC. The Adviser is also subject to regulation by the NFA. The regulatory requirements governing the use of commodity futures, or options, certain swaps or certain other investments could change at any time.

The CFTC and the U.S. commodities exchanges impose limits referred to as "speculative position limits" on the maximum net long or net short speculative positions that any person may hold or control in any particular futures, options contracts or swaps traded on U.S. commodities exchanges, as described under "Position Limits Risk" below.

Derivatives Risk. The value of a derivative instrument, such as the Fund's investments in Aluminum Derivatives, depends largely on (and is derived from) an underlying asset (or a reference rate or index). Derivatives create leverage risk because they do not require payment up front equal to the economic exposure created by owning the derivative. As a result, an adverse change in the value of the underlying asset of a derivative could result in the Fund sustaining a loss that is substantially greater than the amount invested in the derivative, which may make the Fund's returns more volatile and increase the risk of loss. The Fund may not be able to close out a derivative transaction at a favorable time or price, particularly during adverse market conditions or market disruptions, including periods of increased volatility. Derivatives may also be harder to value, less tax efficient, and subject to changing government regulation that could impact the Fund's ability to use certain derivatives or their cost. Also, derivatives used to gain or limit exposure to a particular market segment may not provide the expected benefits, particularly during adverse market conditions. These risks are greater for the Fund than most other ETFs because the Fund will implement its investment strategy primarily through investments in Aluminum Derivatives, which are derivative instruments.

SEC Rule 18f-4 (the "Derivatives Rule") regulates the ability of the Fund to enter into derivative transactions and other leveraged transactions. The Derivatives Rule defines the term "derivatives" to include short sales and forward contracts, in addition to instruments traditionally classified as derivatives, such as swaps, futures, and options. The Derivatives Rule also regulates other types of leveraged transactions, such as reverse repurchase agreements. Under the Derivatives Rule, a fund is prohibited from entering into derivatives transactions except in reliance on the provisions of the Derivatives Rule. The Derivatives Rule establishes limits on the derivatives transactions that a fund may enter into based on the value-at-risk ("VaR") of the fund inclusive of derivatives.

Due to the nature of the Fund's investments, the Fund is required to establish a derivatives risk management program, appoint a derivatives risk manager, and carry out enhanced reporting to the Board, the SEC and the public regarding the Fund's derivatives activities. These requirements will apply unless the Fund qualifies as a "limited derivatives user," which the Derivatives Rule defines as a fund that limits its derivatives exposure to 10% of its net assets. It is possible that the limits and compliance costs imposed by the Derivatives Rule may adversely affect the Fund's performance, efficiency in implementing its strategy, liquidity and/or ability to pursue its investment objectives and may increase the cost of the Fund's investments and cost of doing business, which could adversely affect investors.

- **Futures Risk.** Futures are standardized, exchange-traded contracts that obligate a purchaser to take delivery, and a seller to make delivery, of a specific amount of an asset at a specified future date (the expiration date) at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The primary risks associated with the use of futures contracts and options are: (a) the imperfect correlation between the futures contract and the underlying commodity; (b) the possible lack of a liquid secondary market for a futures contract and the resulting inability to close a futures contract when desired; (c) losses caused by unanticipated market movements, which can, in certain instances, be unlimited; and (d) unfavorable execution prices. The Fund may need to sell a futures contract at an inopportune time for an unfavorable price, for example, the Fund is not permitted to take delivery of the underlying commodity, so as a futures contract approaches its expiration date, the contract may be replaced by a similar contract that has a later expiration. This process is referred to as "rolling." If the market for these contracts is in "contango," meaning that the prices of futures contracts in the nearer months are lower than the price of contracts in the distant months, the sale of the near-term month contract would be at a lower price than the longer-term contract, resulting in a cost to "roll" the futures contract. Contango and backwardation (if the price of the near month futures contract is higher than the next futures month contract) may impact the total return on investment in shares of the Fund relative to the spot prices of the commodities on which the Fund holds futures. It is impossible to predict with any degree of certainty whether backwardation or contango will occur in the future. It is likely that both conditions will occur during different periods.
- **Options Risk.** An option is a type of derivative instrument that gives the holder the right (but not the obligation) to buy ("call") or sell ("put") an asset in the future at an agreed upon price prior to the expiration date of the option. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. The value of options can be highly volatile, and their use can result in loss if the Adviser is incorrect in its expectation of price fluctuations or the degree of correlation between the options and asset markets. The Fund may "cover" a call option by owning the security underlying the option or through other means. When options are purchased over the counter, the Fund bears counterparty risk, which is the risk that the counterparty that wrote the option will be unable or unwilling to perform its obligations under the option contract. Such options may also be illiquid, and in such cases, the Fund may have difficulty closing out its position.

Authorized Participants Risk. The Distributor has entered into Authorized Participant Agreements with a limited number of institutions on behalf of the Fund. Should these Authorized Participants cease to act as such or, for any reason, be unable to create or redeem shares of the Fund and new Authorized Participants are not appointed in their place, shares of the Fund may trade at a discount to the Fund's NAV and possibly face delisting.

Cash Management Risk. To the extent the Fund holds cash, the Fund will earn reduced income (if any) on the cash and will be subject to the credit risk of the depository institution holding the cash and any fees imposed on large cash balances. If a significant amount of the Fund's assets are invested in cash and cash equivalents, the Fund may underperform other funds that do not similarly invest in cash and cash equivalents for investment purposes and/or to collateralize derivative instruments.

Cash Transaction Risk. Creation and redemption transactions are expected to generally settle through payments of cash, which will cause the Fund to incur certain costs, such as brokerage and other transaction costs, that it would not incur if it made in-kind redemptions. Other ETFs generally are able to make in-kind redemptions and avoid realized gains in connection with transactions designed to meet redemption requests. Because the Fund may effect redemptions principally for cash, rather than in-kind distributions, it may be required to sell financial instruments in order to obtain the cash needed to distribute the redemption proceeds. Such cash transactions may have to be carried out over several days if the securities market is relatively illiquid and may involve considerable brokerage fees. These brokerage fees, which will be higher than if the Fund redeemed its shares in kind, will be passed on to redeemers of Creation Units in the form of redemption transaction fees. In addition, these factors may result in wider spreads between the bid and the offered prices of the Fund's shares than for more conventional ETFs (for example, those that track an index of corporate equity securities). In addition, an investment in Fund shares may be less tax efficient than investments in shares of conventional ETFs, and there may be a substantial difference in the after-tax rate of return between the Fund and conventional ETFs.

Commodities Tax Risk. The Fund intends to qualify as a RIC under subchapter M of the Code. If it qualifies as a RIC and satisfies certain minimum distribution requirements, the Fund will not be subject to fund-level U.S. federal income tax on income and gains that it timely distributes to shareholders. To qualify as a RIC, the Fund must satisfy certain source-of-income requirements. The IRS issued a revenue ruling indicating that certain direct investments in commodity-linked instruments would not produce qualifying income for purposes of the RIC source-of-income requirements. Subsequent to this ruling, the IRS issued an additional revenue ruling and several private letter rulings in which it concluded that certain commodity-linked instruments and certain investments in foreign subsidiaries holding commodity-linked instruments would produce qualifying income for purposes of satisfying the RIC source-of-income requirements. As discussed above, the Fund intends to gain exposure to the commodities market primarily through its investment in the Subsidiary. The Fund expects that the Subsidiary will be treated as a controlled foreign corporation (“CFC”), and that the Fund will be required to include certain income of the Subsidiary in its taxable income each taxable year regardless of whether or not the Subsidiary distributes such income. The Code provides that the income inclusion from a CFC will be treated as qualifying income for purposes of the RIC source-of-income requirements if the CFC distributes such income in the same taxable year that such income is includable in the RIC’s taxable income. The IRS and the U.S. Department of the Treasury issued final regulations consistent with the private letter rulings discussed above, concluding that, even if a CFC does not make a current distribution of its income, the income inclusion from a CFC will nonetheless be treated as qualifying income for purposes of the RIC source-of-income requirements as long as it was derived with respect to the RIC’s business of investing in stock, securities, or currencies. As a result, the Fund anticipates that its income inclusion from the Subsidiary will be treated as qualifying income for purposes of the RIC source-of-income requirements. This tax treatment may be adversely affected by additional changes in legislation, regulations, or other legally binding authority. If, as a result of any such adverse action, the income of the Fund from the Subsidiary was treated as non-qualifying income, the Fund might fail to qualify as a RIC, in which case, it would be subject to U.S. federal income tax at the Fund level. Should the IRS issue guidance (which could apply to the Fund retroactively) or Congress enact legislation that adversely affects the tax treatment of the Fund’s investment in the Subsidiary, it could, among other consequences, limit the Fund’s ability to pursue its investment strategy. The Fund seeks to manage its investments in the Subsidiary and Aluminum Derivatives as necessary to maintain its qualification as a RIC.

Fixed Income Investment Risk. When the Fund invests in fixed income instruments, the value of the Fund’s investment will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value. In general, the market price of fixed income instruments with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term instruments. Issuers of fixed income instruments may have their debt downgraded by ratings agencies, or the public may perceive an issuer of a fixed income instrument as not being creditworthy, in which case there is a greater risk that the issuer will default on its obligations to the Fund, resulting in losses to the Fund. Also, a debtor may pay its obligation early, reducing the amount of interest payments. The Fund may be subject to a greater risk of rising interest rates as the Federal Reserve continues to increase interest rates after a period of historically low rates.

Fluctuation of NAV Risk. The market prices of the Fund’s shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the Fund’s shares on NYSE Arca. The Adviser cannot predict whether the Fund’s shares will trade below, at, or above their NAV. Price differences may be due in large part to the fact that supply and demand forces at work in the secondary trading market for the Fund’s shares will be closely related to, but not identical to, the same forces influencing the prices of the Fund’s holdings, trading individually or in the aggregate, at any point in time. The market prices of Fund shares may deviate significantly from the NAV of Fund shares during periods of market volatility. However, given that the shares can be purchased and redeemed in Creation Units (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAVs), the Adviser believes that large discounts or premiums to the NAV of the Fund’s shares should not be sustained over long periods. If an investor purchases the Fund’s shares at a time when the market price is at a premium to the NAV of the Fund’s shares or sells at a time when the market price is at a discount to the NAV of the Fund’s shares, then the investor may sustain losses.

Intermediary and Counterparty Risk. Futures agreements, and other forms of derivatives, as well as fixed income instruments, involve intermediaries or counterparties and therefore subject the Fund to the risk that an intermediary or counterparty could default on its obligations under an agreement, either through the intermediary’s or counterparty’s bankruptcy or general failure to perform its obligations. In the event of default, the Fund may not be able to recover its assets. Moreover, even if the Fund is able to recover some or all of its assets, such recovery could involve lengthy delays. During any such period, the Fund may have difficulty determining the value of its investments associated with the intermediary or counterparty, which in turn could result in the overstatement or understatement of the Fund’s NAV. This may negatively affect the Fund’s share price and may cause the Fund’s shares to trade at a premium or discount to NAV. Contractual provisions and applicable law may prevent or delay the Fund from exercising its rights to terminate an investment or transaction with a financial institution experiencing financial difficulties, or to realize on collateral (i.e., access the collateral in the event of a counterparty’s default). Further, another institution may be substituted for the struggling financial institution without the consent of the Fund. For exchange-traded derivatives, including the Fund’s investments in futures contracts, an

FCM serves as the intermediary to the Fund (the FCM, in turn, serves as an intermediary to the applicable clearing organization). In such cases, the Fund faces the risk that the FCM would default on its obligations, including the FCM's obligation to return margin posted by the Fund. If any intermediary or counterparty to the Fund becomes bankrupt or otherwise fails to perform its obligations due to financial difficulties, the Fund may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding.

Investing in Other Investment Companies Risk. An investment in other investment companies (including money market funds) is subject to the risks associated with those investment companies. To the extent the Fund invests in other investment companies, the Fund's shareholders will incur certain duplicative fees and expenses, including investment advisory fees. The return on such investments will be reduced by the operating expenses, including investment advisory and administration fees, of such investment companies, and will be further reduced by the Fund's own expenses, including management fees; that is, there will be a layering of certain fees and expenses.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and distributions therefore may decline. In 2022, inflation rates rose to the highest levels seen in many decades, and rates have remained elevated into 2023. As inflation increases, the real value of the Fund's shares and distributions therefore may decline. Inflation rates may change frequently and significantly as a result of various factors, including unexpected shifts in the domestic or global economy and changes in economic policies, and the Fund's investments may not keep pace with inflation, which may result in losses to Fund shareholders.

Leverage Risk. Borrowing transactions, derivatives transactions, and other investment transactions may create investment leverage. If the Fund engages in transactions that have a leveraging effect on the Fund's investment portfolio, the value of the Fund will be potentially more volatile and all other risks will tend to be compounded. This is because leverage generally creates investment risk with respect to a larger base of assets than the Fund would otherwise have and so magnifies the effect of any increase or decrease in the value of the Fund's underlying assets. The use of leverage is considered to be a speculative investment practice and may result in losses to the Fund. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. The use of leverage may cause the Fund to liquidate positions when it may not be advantageous to do so to satisfy repayment, interest payment, or margin obligations or other requirements.

Liquidity Risk. The Fund may not always be able to liquidate its positions in its Aluminum Derivatives at the desired price or time (or at all) or at prices approximating those at which the Fund currently values them. It may be difficult for the Fund to value illiquid holdings accurately. A market disruption or a foreign government taking political actions that disrupt the market for its currency, its crude oil production or exports, or another major export, can also make it difficult to liquidate a position. The market for certain investments may become illiquid under adverse market or economic conditions independent of any specific adverse changes in the conditions of a particular issuer. Alternatively, limits imposed by the futures exchanges or other regulatory organizations, such as accountability levels, position limits, or daily price fluctuation limits, may contribute to a lack of liquidity. Unexpected market illiquidity may cause major losses at any time. The Fund does not intend at this time to establish a credit facility, which could provide an additional source of liquidity. Instead, the Fund relies only on its assets for liquidity. The anticipated large value of the positions that the Fund will acquire or enter into increases the risk of illiquidity. Disposal of illiquid securities may entail registration expenses and other transaction costs that are higher than those for liquid securities.

Long-Term Objective; Not a Complete Investment Program. The Fund is intended for investors seeking exposure to the price of aluminum over the long term. An investment in shares of the Fund should not be considered a complete investment program. Each shareholder should take into account the Fund's investment objectives as well as the shareholder's other investments when considering an investment in the Fund.

Management Risk. The Fund is subject to management risk because its portfolio will be actively managed. The Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Market Risk. The trading prices of financial instruments fluctuate, sometimes rapidly and unpredictably, in response to a variety of factors. These factors include events impacting a specific market segment or the entire market, including global pandemics, such as COVID-19. The Fund's NAV and market price may fluctuate significantly due to market risk. The Fund, and investors, could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns, such as a recession. The loss of the entire principal amount of an investment is possible.

New Fund Risk. Since the Fund is new, there can be no assurance that the Fund will grow to or maintain an economically viable size. If a new fund were to fail to successfully implement its investment strategies or achieve its investment objectives, performance may be negatively impacted, and any resulting liquidation could create negative transaction costs for the fund and tax consequences for investors.

Non-Diversification Risk. The Fund will pursue its investment strategy without regard to whether its investment strategy presents adequate diversification among individual holdings. If there are adverse changes in the financial condition of a particular investment, the resulting adverse impact on the performance of the Fund may be more pronounced than if the Fund were more diversified.

Non-U.S. Investment Risk. The Fund may invest in Aluminum Derivatives traded on non-U.S. exchanges. Transactions on non-U.S. exchanges present greater risk to the extent that they are not subject to the same degree of regulation as their U.S. counterparts. Because certain of the Fund's underlying investments trade in markets that are closed when the market in which the Fund's shares are listed for trading is open, there may be changes between the investment's last quote from the closed foreign market and the value of the investment during the Fund's domestic trading day. This may result in differences between the market price of the Fund's shares and the underlying value of the Fund's shares.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and its service providers seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Position Limits Risk. Accountability levels, position limits, and daily price fluctuation limits set by futures exchanges have the potential to prevent the Fund from trading certain futures contracts or employing its investment strategies. Futures exchanges have established accountability levels and position limits on the maximum net long or net short positions that any person or group of persons under common trading control may hold, own, or control. In addition to accountability levels and position limits, futures exchanges also set daily price fluctuation limits on futures contracts. The Fund may be unable to trade futures contracts due to such limitations.

In addition, Part 150 of the CFTC's regulations establishes federal position limits for 25 "core" physical commodity futures contracts and swaps that are economically equivalent to such contracts, in the agriculture, energy and metals markets (the "Position Limit Rules"). Among other things, the Position Limit Rules: identify which contracts are subject to speculative position limits; set thresholds that restrict the size of speculative positions that a person may hold in the spot month; create an exemption for positions that constitute bona fide hedging transactions; impose responsibilities on designated contract markets ("DCMs") and swap execution facilities ("SEFs") to establish position limits or, in some cases, position accountability rules; and apply to both futures and swaps across four relevant venues: over the counter, DCMs, SEFs as well as certain non-U.S. located platforms.

For the purpose of the Position Limit Rules, a market participant is generally required, subject to certain narrow exceptions, to aggregate all positions for which that participant controls the trading decisions with all positions for which that participant has a 10 percent or greater ownership interest in an account or position, as well as the positions of two or more persons acting pursuant to an express or implied agreement or understanding with that market participant (the "Aggregation Rules").

The Position Limit Rules may negatively impact the ability of the Fund to meet its investment objective through limits that may inhibit the Adviser's ability to purchase certain futures contracts.

Close-Out Risk for Qualified Financial Contracts. Regulations adopted by global prudential regulators that are now in effect require counterparties that are part of U.S. or foreign global systemically important banking organizations to include contractual restrictions on close-out and cross-default in agreements relating to qualified financial contracts. Qualified financial contracts include agreements relating to swaps, currency forwards and other derivatives as well as repurchase agreements and securities lending agreements. The restrictions prevent the Fund from closing out a qualified financial contract during a specified time period if the counterparty is subject to resolution proceedings and also prohibit the Fund from exercising default rights due to a receivership or similar proceeding of an affiliate of the counterparty. These requirements may increase credit risk and other risks to the Fund.

Repurchase Agreements Risk. Repurchase agreements are instruments under which the Fund acquires ownership of a security, and the seller, a broker-dealer or a bank agrees to repurchase the security at a mutually agreed upon time and price. Repurchase agreements expose the Fund to the risk that the counterparty defaults on its obligation to repurchase the

underlying instruments collateralizing the repurchase agreement. In this circumstance, the Fund could lose money if the underlying instruments used as collateral lose their value before they can be sold. The Fund intends to enter into repurchase agreements that are cleared through the Fixed Income Clearing Corporation (“FICC”). In a FICC cleared transaction, the Fund would permit the seller’s obligation to be novated to FICC pursuant to an agreement between the Fund, FICC and the seller as a sponsoring member of FICC. In such case, the FICC would become the Fund’s counterparty. FICC acts as the common counterparty to all repurchase transactions that enter its netting system and guarantees that participants will receive their cash or securities collateral (as applicable) back at the close of the repurchase transaction. While this guarantee is intended to mitigate counterparty/credit risk that exists in the case of a bilateral repurchase transaction, the Fund is exposed to risk of delays or losses in the event of a bankruptcy or other default or nonperformance by FICC or the FICC sponsoring member through which the Fund acts in connection with such transactions.

Secondary Market Risk. Although the Fund’s shares are listed for trading on NYSE Arca and may be listed or traded on U.S. and non-U.S. stock exchanges other than NYSE Arca, there can be no assurance that an active trading market for such shares will develop or be maintained. Market makers are under no obligation to make a market in the Fund’s shares, and Authorized Participants are not obligated to submit purchase or redemption orders for Creation Units. In times of market stress, market makers or other Authorized Participants may step away from their respective roles in making a market in shares of the Fund and in executing purchase or redemption orders, and this could, in turn, lead to variances between the market price of the Fund’s shares and the underlying value of those shares. Trading in shares may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in shares inadvisable. In addition, trading in shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca “circuit breaker” rules. In stressed market conditions, the market for an ETF’s shares may become less liquid in response to deteriorating liquidity in the markets for the ETF’s underlying portfolio holdings, which can result in wider bid/ask spreads and differences between the ETF’s NAV and market price. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged or that Fund shares will trade with any volume, or at all, on any stock exchange. Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers and will incur the cost of the difference between “bid” and “ask” prices of the Fund’s shares.

Subsidiary Investment Risk. By investing in the Subsidiary, the Fund will be indirectly exposed to the risks associated with the Subsidiary’s investments. There can be no assurance that the investment objective of the Subsidiary will be achieved. The Subsidiary is not registered under the 1940 Act and is not subject to all the investor protections of the 1940 Act. Thus, the Fund, as an investor in the Subsidiary, will not have all the protections afforded to investors in registered investment companies. A shareholder’s cost of investing in the Fund may be higher because shareholders bear the expenses of the Subsidiary. In addition, changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary are organized or incorporated, respectively, could result in the inability of the Fund or the Subsidiary to operate as described in this Prospectus and the SAI and could negatively affect the Fund.

Treasuries Risk. The Fund invests in U.S. government obligations. U.S. government obligations include Treasuries and securities issued or guaranteed by various agencies of the U.S. government or by various instrumentalities which have been established or sponsored by the U.S. government. Treasuries are backed by the “full faith and credit” of the U.S. government. The value of Treasuries generally moves inversely with movements in interest rates. The prices of longer maturity securities are generally subject to greater market fluctuations as a result of changes in interest rates. If the Fund is required to sell Treasuries or other U.S. government obligations at a price lower than the price at which they were acquired, the Fund will experience a loss.

Ukraine War Risk. On February 24, 2022, Russia launched a large-scale invasion of Ukraine. The extent and duration of the military action, resulting sanctions and future market disruptions in the region are impossible to predict, but could be significant and may have a severe adverse effect on the region. Among other things, the conflict has resulted in increased volatility in the markets for certain commodities.

The United States and other countries and certain international organizations have imposed broad-ranging economic sanctions on Russia and certain Russian individuals, banking entities and corporations as a response to Russia’s invasion of Ukraine, and additional sanctions may be imposed in the future. Such sanctions (and any future sanctions) will adversely impact the economies of Russia and Ukraine, and certain sectors of each country’s economy may be particularly affected, including but not limited to, financials, energy, metals and mining, engineering and defense and defense-related materials sectors. Among other things, the extent and duration of the military action, the responses of countries and political bodies to Russia’s actions, including sanctions, future market or supply disruptions, and Ukraine’s military response and the potential for wider conflict may increase financial market volatility generally, have severe adverse effects on regional and global economic markets, and cause volatility in the markets for commodities including the price of commodity futures, and the NAV or share price of the Fund.

A resolution to the war in Ukraine also could impact the markets for certain commodities and may have collateral impacts, including increased volatility, and cause disruptions to availability of certain commodities, commodity and futures prices and the supply chain globally. The longer-term impact on commodities and futures prices is difficult to predict and depends on a number of factors that may have a negative impact on the Fund in the future.

Valuation Risk. The sale price the Fund could receive for a security or other asset may differ from the Fund's valuation of the security or asset, particularly for securities or assets that trade in low volume or volatile markets or that are valued using a fair value methodology. Some portfolio holdings, potentially a large portion of the Fund's investment portfolio, may be valued on the basis of factors other than market quotations. This may occur more often in times of market turmoil or reduced liquidity. There are multiple methods that can be used to value a portfolio holding when market quotations are not readily available. The value established for any portfolio holding at a point in time might differ from what would be produced using a different methodology or if it had been priced using market quotations. Portfolio holdings that are valued using techniques other than market quotations, including "fair valued" securities, may be subject to greater fluctuation in their valuations from one day to the next than if market quotations were used. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued investments may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the Fund had not fair-valued the holding(s) or had used a different valuation methodology. In addition, the value of the securities or assets in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

PORTFOLIO HOLDINGS INFORMATION

The Fund's portfolio holdings will be disclosed each day on its website at www.uscfinvestments.com. A description of the Fund's policies and procedures with respect to the disclosure of portfolio holdings is available in the SAI.

MANAGEMENT

Adviser

The Adviser serves as the investment adviser of the Fund and the Subsidiary. The Adviser has been registered as an investment adviser with the SEC since July 1, 2014, and is a wholly-owned subsidiary of USCF Investments, Inc., formerly Wainwright Holdings, Inc. ("USCF Investments"). USCF Investments is a wholly-owned subsidiary of The Marygold Companies, Inc. (formerly Concierge Technologies, Inc.), a company publicly traded under the ticker symbol "MGLD" ("Marygold"). Mr. Nicholas Gerber, along with certain family members and certain other shareholders, own the majority of the shares in Marygold. USCF Investments continues to operate its business as a wholly-owned subsidiary of Marygold.

The Adviser's offices are located at 1850 Mt. Diablo Blvd., Suite 640, Walnut Creek, CA 94596. As of June 30, 2023, the Adviser and its affiliates had approximately \$3.5 billion in assets under management.

The Adviser has overall responsibility for the general management and administration of the Fund and Subsidiary and provides an investment program for the Fund and the Subsidiary. The Adviser has arranged for custody, distribution, fund administration, transfer agency, and all other services necessary for the Fund and the Subsidiary to operate. The Adviser bears all of its own costs associated with providing advisory services and the expenses of the members of the Board who are affiliated with the Adviser. The Adviser may make payments from its own resources to broker-dealers and other financial institutions in connection with the sale of Fund shares.

On November 8, 2021, the United States Oil Fund, LP ("USO"), as well as its general partner, the United States Commodity Funds LLC ("USCF"), announced a resolution with each of the SEC and the CFTC relating to matters set forth in certain Wells Notices issued by the staffs of each of the SEC and CFTC as more fully described below. Like the Adviser, USCF is a wholly-owned subsidiary of Marygold.

On August 17, 2020, USCF, USO, and John P. Love, the president and chief executive officer of USCF, received a "Wells Notice" from the staff of the SEC (the "SEC Wells Notice"). The SEC Wells Notice stated that the SEC staff made a preliminary determination to recommend that the SEC file an enforcement action against USCF, USO, and Mr. Love alleging violations of Sections 17(a)(1) and 17(a)(3) of the Securities Act of 1933, as amended (the "1933 Act"), and Section 10(b) of the Securities Exchange Act of 1934, as amended, and Rule 10b-5 thereunder, in each case with respect to its disclosures and USO's actions.

Subsequently, on August 19, 2020, USCF, USO, and Mr. Love received a Wells Notice from the staff of the CFTC (the "CFTC Wells Notice"). The CFTC Wells Notice stated that the CFTC staff made a preliminary determination to recommend that the CFTC file an enforcement action against USCF, USO, and Mr. Love alleging violations of Sections 4o(1)(A) and (B) and 6(c)(1) of the CEA, 7 U.S.C. §§ 6o(1)(A) and (B) and 9(1) (2018), and CFTC Regulations 4.26, 4.41, and 180.1(a), 17 C.F.R. §§ 4.26, 4.41, 180.1(a) (2019), in each case with respect to its disclosures and USO's actions.

On November 8, 2021, acting pursuant to an offer of settlement submitted by USCF and USO, the SEC issued an order instituting cease-and-desist proceedings, making findings, and imposing a cease-and-desist order pursuant to Section 8A of the 1933 Act, directing USCF and USO to cease and desist from committing or causing any violations of Section 17(a)(3) of the 1933 Act, 15 U.S.C. § 77q(a)(3) (the “SEC Order”). In the SEC Order, the SEC made findings that, from April 24, 2020 to May 21, 2020, USCF and USO violated Section 17(a)(3) of 1933 Act, which provides that it is “unlawful for any person in the offer or sale of any securities . . . to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser.” USCF and USO consented to entry of the SEC Order without admitting or denying the findings contained therein, except as to jurisdiction.

Separately, on November 8, 2021, acting pursuant to an offer of settlement submitted by USCF, the CFTC issued an order instituting cease-and-desist proceedings, making findings, and imposing a cease-and-desist order pursuant to Section 6(c) and (d) of the CEA, directing USCF to cease and desist from committing or causing any violations of Section 4o(1)(B) of the CEA, 7 U.S.C. § 6o(1)(B), and CFTC Regulation 4.41(a)(2), 17 C.F.R. § 4.41(a)(2) (the “CFTC Order”). In the CFTC Order, the CFTC made findings that, from on or about April 22, 2020 to June 12, 2020, USCF violated Section 4o(1)(B) of the CEA and CFTC Regulation 4.41(a)(2), which make it unlawful for any commodity pool operator (“CPO”) to engage in “any transaction, practice, or course of business which operates as a fraud or deceit upon any client or participant or prospective client or participant” and prohibit a CPO from advertising in a manner which “operates as a fraud or deceit upon any client or participant or prospective client or participant,” respectively. USCF consented to entry of the CFTC Order without admitting or denying the findings contained therein, except as to jurisdiction.

Pursuant to the SEC Order and the CFTC Order, in addition to the command to cease and desist from committing or causing any violations of Section 17(a)(3) of the 1933 Act, Section 4o(1)(B) of the CEA, and CFTC Regulation 4.14(a)(2), civil monetary penalties totaling two million five hundred thousand dollars (\$2,500,000) in the aggregate was required to be paid to the SEC and CFTC, of which one million two hundred fifty thousand dollars (\$1,250,000) has been paid by USCF to each of the SEC and the CFTC, respectively, pursuant to the offsets permitted under the orders.

The SEC Order can be accessed at www.sec.gov and the CFTC Order can be accessed at www.cftc.gov.

Commodity Pool Operation

The Fund and the Subsidiary invest in commodity interests and are considered commodity pools, thereby subjecting the Fund and the Subsidiary to further regulation by the CFTC and the National Futures Association (“NFA”). The NFA is designated by the CFTC as a registered futures association and is the self-regulatory organization for the U.S. derivatives industry.

In connection with its role as investment adviser to the Fund and the Subsidiary, the Adviser has registered as a commodity pool operator (“CPO”) under the CEA. Accordingly, the Adviser is subject to registration and regulation as a CPO under the CEA, and must comply with various regulatory requirements under the CEA and the rules and regulations of the CFTC and the NFA, including antifraud provisions, disclosure requirements, and reporting and recordkeeping requirements. The Adviser is also subject to periodic inspections and audits by the CFTC and NFA.

The CFTC’s harmonization rules regarding the disclosure, reporting, and recordkeeping requirements apply to the Fund as a result of the Adviser’s registration as a CPO. Generally, these rules allow for substituted compliance with CFTC disclosure and shareholder reporting requirements, based on the Adviser’s compliance with comparable SEC requirements. This means that for most of the CFTC’s disclosure and shareholder reporting requirements applicable to the Adviser as the Fund’s CPO, the Fund’s compliance with SEC disclosure and shareholder reporting requirements will be deemed to fulfill the Adviser’s CFTC compliance obligations.

The Fund’s status as a commodity pool and the Adviser’s registration as a CPO are not expected to materially adversely affect the Fund’s ability to carry out its investment strategies. However, there may be additional compliance and other expenses for the Fund. In addition, registration as a CPO subjects the Adviser to additional laws, regulations, and enforcement policies, all of which could increase compliance costs and may affect operations and the financial performance of the Fund.

Manager of Managers Structure

The Adviser and the Trust have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund and the Subsidiary without shareholder approval (the “Manager of Managers Structure”). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight of the Board, for overseeing the Trust’s sub-advisers and recommending to the Board their hiring, termination, or replacement.

The Manager of Managers Structure enables the Trust to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. Operation of the Fund under the Manager of Managers Structure does not: (1) permit management fees paid by the Fund to the Adviser to be increased without shareholder approval; or (2) diminish the Adviser’s responsibilities to the Fund or the Subsidiary, including the Adviser’s overall responsibility for overseeing the portfolio management services furnished by its sub-advisers. Shareholders will be notified of any changes made to sub-advisers or sub-advisory agreements within 90 days of the change.

Advisory Agreements

The Adviser serves as investment adviser to the Fund pursuant to an investment advisory agreement (the “Advisory Agreement”) and as investment adviser to the Subsidiary pursuant to a separate investment advisory agreement (the “Subsidiary Advisory Agreement”). The Adviser complies with the provisions of the 1940 Act relating to investment advisory contracts with respect to both the Fund and the Subsidiary.

The Advisory Agreement and the Subsidiary Advisory Agreement were approved by the Board at the September 20, 2023 meeting of the Board. A discussion of the Board’s approval of these agreements, including the basis for the Board’s approval, will be included in the Fund’s semi-annual report to shareholders for the period ending December 31, 2023.

Management Fees

The Fund pays the Adviser a unitary management fee as compensation for its services and its assumption of all Fund expenses, including the costs of investing in the Subsidiary. The Adviser is responsible for all expenses of the Fund except expenses for taxes and governmental fees; brokerage fees; commissions and other transaction expenses; costs of borrowing money, including interest expenses; securities lending expenses; extraordinary expenses (such as litigation and indemnification expenses); and fees and expenses of any independent legal counsel. The Adviser may voluntarily waive any portion of its management fee from time to time, and may discontinue or modify any such voluntary limitations in the future at its discretion. The Subsidiary does not pay management fees to the Adviser.

The following table lists the total management fee paid by the Fund.

Fund	Management Fee
USCF Aluminum Strategy Fund	0.65%

PORTFOLIO MANAGEMENT

The Adviser supervises and manages the investment portfolio of the Fund and directs the purchase and sale of the Fund’s investments. The Adviser utilizes a team of investment professionals acting together to manage the assets of the Fund. The team meets regularly to review the Fund’s portfolio holdings and to discuss purchase and sale activity. The team adjusts holdings in the Fund’s portfolio as they deem appropriate in the pursuit of the Fund’s investment objective. The Fund and the Subsidiary are jointly managed by the Adviser to comply with the compliance policies and procedures of the Fund.

In managing the Fund’s and the Subsidiary’s portfolios, the Adviser will comply with the investment policies and restrictions that apply to the management of the Fund. The Fund complies with the provisions of the 1940 Act governing investment policies and capital structure and leverage on an aggregate basis with the Subsidiary. The Subsidiary’s principal investment strategies and principal risks constitute principal investment strategies and principal risks of the Fund. Both the Fund and the Subsidiary comply with the provisions of the 1940 Act relating to affiliated transactions and custody.

The members of the team primarily responsible for the day-to-day portfolio management of the Fund are:

Andrew F Ngim co-founded United States Commodity Funds, LLC (“USCF”) in 2005 and has served as a Management Director from May 2005 to April 2023 and, since August 15, 2016, has served as the Chief Operating Officer of USCF. Mr. Ngim has served as the portfolio manager for United States Commodity Index Fund, United States Copper Index Fund, and United States Agriculture Index Fund since January 2013. Mr. Ngim also served as USCF’s Treasurer from June 2005 to February 2012. In addition, he has been on the Board of Managers and has served as the Assistant Secretary and Assistant Treasurer of the Adviser since its inception in June 2013. Prior to and concurrent with his services to USCF and the Adviser, from January 1999 to January 2013, Mr. Ngim served as a Managing Director for Ameristock Corporation, a California-based investment adviser, which he co-founded in March 1995, and was Co-Portfolio Manager of Ameristock Mutual Fund, Inc. from January 2000 to January 2013. In addition to the Fund, Mr. Ngim also served or is serving as portfolio manager of the Stock Split Index Fund (from September 2014 through September 2017), the USCF Restaurant Leaders Fund (from

November 2016 through September 2017), USCF SummerHaven SHPEI Index Fund (November 2017 through October 2020), USCF SummerHaven SHPEN Index Fund (November 2017 through May 2020), the USCF SummerHaven Dynamic Commodity Strategy No K-1 Fund (May 2018 through present), the USCF Sustainable Battery Metals Strategy Fund (February 2023 through present), the USCF Sustainable Commodity Strategy Fund (August 2023 through present), and the USCF Energy Commodity Strategy Absolute Return Fund (May 2023 through present), each of which was or is a series of USCF ETF Trust. Mr. Ngim has also served as a Management Trustee of USCF ETF Trust from August 2014 through the present and of the USCF Mutual Funds Trust from October 2016 through the present. Mr. Ngim served as the portfolio manager of the USCF Commodity Strategy Fund, a series of USCF Mutual Funds Trust, from its inception in 2017 through March 2019. Mr. Ngim has been a principal listed with the CFTC and NFA of USCF since November 2005 and of the Adviser since January 2017. Mr. Ngim earned his B.A. from the University of California at Berkeley.

Darius Coby is a portfolio manager for the Adviser. In addition to serving as portfolio manager of the Fund, he serves as portfolio manager of the USCF Sustainable Battery Metals Strategy Fund (February 2023 through present), USCF Sustainable Commodity Strategy Fund (August 2023 through present) and the USCF Energy Commodity Strategy Absolute Return Fund (May 2023 through present), each a series of the USCF ETF Trust. He also serves as the Director of Operations of USCF since March 2022 and oversees the technical operations of all USCF products including trading. Mr. Coby joined USCF in February 2015 and prior to joining USCF, he was the Customer Service Manager for Mechanics Bank.

Seth Lancaster is a portfolio manager for the Adviser. In addition to serving as portfolio manager for the Fund, he serves as portfolio manager of the USCF SummerHaven Dynamic Commodity Strategy No K-1 Fund (July 2022 through present), the USCF Sustainable Battery Metals Strategy Fund (February 2023 through present), the USCF Sustainable Commodity Strategy Fund (August 2023 through present), and the USCF Energy Commodity Strategy Absolute Return Fund (May 2023 through present), each a series of the USCF ETF Trust. Prior to joining the Adviser in June 2022, Mr. Lancaster worked as Team Lead of ETF Portfolio Management Analysts for Invesco, an investment manager that manages a broad suite of exchange-traded funds and products, from May 2016 to May 2022. From June 2013 to April 2016, Mr. Lancaster worked as a Senior Analyst at Performance Trust Capital Partners LLC, a full-service investment bank. Mr. Lancaster obtained his M.B.A. from Elmhurst College in 2016 and his B.A. in Financial Economics from Capital University in 2012.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of shares in the Fund.

OTHER SERVICE PROVIDERS

Fund Administrator, Custodian, and Transfer Agent

The Bank of New York Mellon ("BNY Mellon"), located at 240 Greenwich Street, New York, New York 10286, serves as the Fund's administrator, custodian, and transfer agent.

Under a fund administration and accounting agreement, BNY Mellon serves as administrator for the Fund and provides necessary valuation and computation accounting services, financial reporting services, tax services, fund administration services, and regulatory administration services for the Fund.

Distributor

ALPS Distributors, Inc., located at 1290 Broadway, Suite 1000, Denver, CO 80203, serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in shares.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., located at 1835 Market Street, Suite 310, Philadelphia, Pennsylvania 19103, serves as the independent registered public accounting firm for the Trust and the Fund.

Legal Counsel

Eversheds Sutherland (US) LLP, 700 Sixth Street, NW, Suite 700, Washington, DC 20001-3980, serves as legal counsel to the Trust and the Fund.

Management of the Subsidiary

The Subsidiary is wholly-owned by the Fund. The Subsidiary is an exempted company incorporated under the laws of the Cayman Islands and overseen by its own board of directors. The Fund is the sole shareholder of the Subsidiary, and shares in the Subsidiary will not be sold or offered to other investors. The Adviser serves as the investment adviser of the Subsidiary. The Fund and the Subsidiary are jointly managed by the Adviser to comply with the compliance policies and procedures of the Fund.

The Fund and the Subsidiary are jointly managed by the Adviser to comply with the compliance policies and procedures of the Fund. As a result, in managing the Fund's and the Subsidiary's portfolios, the Adviser will comply with the investment policies and restrictions that apply to the management of the Fund.

The Subsidiary is not registered under the 1940 Act and is not subject to all the investor protections of the 1940 Act. Thus, the Fund, as an investor in the Subsidiary, will not have all the protections afforded to investors in registered investment companies. Nonetheless, the Fund wholly-owns and controls the Subsidiary, and the Fund and the Subsidiary are both managed by the Adviser, making it unlikely that the Subsidiary would take action contrary to the interests of the Fund and its shareholders.

The Fund complies with the provisions of the 1940 Act governing investment policies and capital structure and leverage on an aggregate basis with the Subsidiary. The Subsidiary's principal investment strategies and principal risks are identical to the Fund's principal investment strategies and principal risks. Both the Fund and the Subsidiary comply with the provisions of the 1940 Act relating to affiliated transactions and custody.

The Fund's Chief Compliance Officer oversees implementation of the Subsidiary's policies and procedures and makes periodic reports to the Board regarding the Subsidiary's compliance therewith. In addition, the Subsidiary is a commodity pool, like the Fund, and the Adviser is the commodity pool operator of the Subsidiary, as well as the Fund. BNY Mellon serves as the custodian, administrator, and accountant for the Subsidiary.

CYBERSECURITY RISK

The Trust and its service providers depend heavily upon computer systems to perform necessary business functions. As such, the Trust and its service providers may be prone to operational and information security risks resulting from breaches in cybersecurity. While the Trust and its service providers engage in actions to maintain cybersecurity and mitigate the risks associated with cybersecurity breaches, there is no guarantee that the Trust or its service providers will successfully prevent cybersecurity breaches or that cybersecurity breaches or threats will not interrupt the Trust's operations, result in increased costs to the Trust, or negatively affect you or your investment in the Fund.

A breach in cybersecurity refers to both intentional and unintentional events that may cause the Trust or its service providers to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cybersecurity include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information, or various other forms of cyber-attacks. A breach in cybersecurity may also include or result from a natural catastrophe, industrial accident, failure of disaster recovery systems, or employee error. Breaches in cybersecurity may become particularly acute if they affect electronic data processing; affect transmission, storage, or retrieval systems; or impact the availability, integrity, or confidentiality of data. Despite the implementation of security measures, computer systems, networks, and data related to the Trust's operations, like those of other companies, could be subject to cyber-attacks and unauthorized access, use, alteration, or destruction, such as from physical and electronic break-ins or unauthorized tampering.

Cybersecurity breaches may interfere with the processing of transactions, impact the Trust's ability to calculate its NAVs, cause the release of private information or confidential business information, impede trading, cause the Trust to incur costs associated with mitigation or remediation, subject the Trust to regulatory fines or financial losses, and/or cause customer dissatisfaction or reputational harm to the Trust. The Trust may also incur additional costs to increase cybersecurity. Similar types of cybersecurity risks are also present for issuers of securities in which the Trust may invest, which could result in material adverse consequences for such issuers and may cause the Trust's investments to lose value.

ADDITIONAL INFORMATION ON BUYING AND SELLING FUND SHARES

Trading Fund Shares

Most investors will buy and sell shares of the Fund through brokers on the secondary market. Shares of the Fund trade on NYSE Arca and elsewhere during the trading day and can be bought and sold throughout the trading day like other publicly-traded securities. When buying or selling shares through a broker, investors will incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Shares of the Fund trade under the trading symbol “ALUM”.

Transaction Fees on Creation and Redemption Transactions

Authorized Participants are required to pay a transaction fee to compensate the Fund for brokerage and transaction expenses when purchasing or redeeming Creation Units. The transaction fee is charged to the Authorized Participant on the day such Authorized Participant purchases or redeems a Creation Unit. The Fund reserves the right to waive transaction fees if doing so is in the best interest of the Fund.

The following table shows the transaction fee and maximum additional charges for creations and redemptions by Authorized Participants (as described above):

Creation Unit Size	Standard Creation/ Redemption Transaction Fee
25,000	\$250

SHARE TRADING PRICES

Transactions in the Fund’s shares will be priced at NAV only for Authorized Participants transacting in Creation Units. All other investors buy and sell shares of the Fund through brokers at prices established throughout the day in the secondary market. As with other types of securities, the trading prices of shares in the secondary market can be affected by market forces such as supply and demand, economic conditions, and other factors. Accordingly, the price most investors pay or receive when they buy or sell your shares in the secondary market may be more or less than the NAV of such shares.

DETERMINATION OF NET ASSET VALUE

The NAV of the Fund’s shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on NYSE Arca, generally 4:00 p.m. New York time. If regular trading on NYSE Arca closes earlier than 4:00 p.m. New York time on a given day, the NAV of the Fund’s shares will be calculated as of that earlier time. The time as of which the Fund calculates its NAV is referred to as the “NAV Calculation Time”. NAV per share is calculated by dividing the Fund’s net assets by the number of the Fund’s outstanding shares.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. Debt obligations with maturities of 60 days or less are valued at amortized cost.

Fair value pricing is used by the Fund when reliable market valuations are not readily available or are not deemed to reflect current market values. Securities that may be valued using “fair value” pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by “significant events.” An example of a significant event is an event, occurring after the close of the market in which a security trades but before the Fund’s next NAV Calculation Time, that may materially affect the value of the Fund’s investment (e.g., government action, natural disaster, or significant market fluctuation). When fair-value pricing is employed, the prices of securities used by the Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Rule 2a-5 under the 1940 Act sets forth the requirements for determining fair value in good faith. Pursuant to Rule 2a-5, the Board, including a majority of Trustees who are not “interested persons” of the Trust, as such term is defined in the 1940 Act, designated the Adviser to perform fair value determinations and act as “valuation designee.” As valuation designee, the Adviser must (i) periodically assess and manage valuation risks; (ii) establish and apply fair value methodologies; (iii) test fair value methodologies; (iv) oversee and evaluate independent pricing services; (v) provide the Board with the reporting required under Rule 2a-5; and (vi) maintain records as required under Rule 31a-4 under the 1940 Act.

The Fund may invest up to 25% of its total assets in the Subsidiary. The Subsidiary offers to redeem all or a portion of its shares every Business Day. The value of the Subsidiary's shares will fluctuate with the value of its portfolio investments. The Subsidiary uses the same methodologies described above to price its shares.

PREMIUM/DISCOUNT INFORMATION

Information regarding the extent and frequency with which market prices of the Fund's shares have traded at a premium or discount to the Fund's NAV for the most recently completed calendar year and the completed calendar quarters thereafter will be available without charge at www.uscfinvestments.com.

DIVIDENDS AND DISTRIBUTIONS

The Fund intends to pay out dividends, if any, on an annual basis. The Fund intends to distribute its net realized capital gains, if any, to investors annually. The Fund may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

BOOK ENTRY

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding shares of the Fund.

Investors owning shares of the Fund are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares of the Fund. Participants include DTC, securities brokers and dealers, banks, trust companies, clearing corporations, and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any securities that you hold in book-entry or "street name" form. Your broker will provide you with account statements, confirmations of your purchases and sales, and tax information.

DELIVERY OF SHAREHOLDER DOCUMENTS – HOUSEHOLDING

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

FREQUENT TRADING

Shares of the Fund may be purchased and redeemed directly from the Fund only in Creation Units by Authorized Participants. The vast majority of trading in the Fund's shares occurs on the secondary market and does not involve the Fund directly. Cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent trading. Cash purchases and redemptions of Creation Units can result in disruption of portfolio management, dilution to the Fund and increased transaction costs, all of which could negatively impact the Fund's ability to achieve its investment objective, and may lead to the realization of capital gains. These consequences may become magnified as the frequency of cash purchases and redemptions of Creation Units by Authorized Participants increases. However, direct trading by Authorized Participants is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential negative consequences, the Fund employs fair valuation pricing and imposes transaction fees on Creation Unit transactions to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, if in the discretion of the Adviser, it is determined to be necessary or appropriate, the Adviser will monitor trades by Authorized Participants for patterns of abusive trading, and in such case, the Fund reserves the right to not accept orders from Authorized Participants that the Adviser has determined may be disruptive to the management of the Fund or otherwise not in the best interests of the Fund.

The Fund does not impose restrictions on, or monitor for, frequent trading activity in the secondary market. In determining not to restrict the frequency of purchases or sales, the Board determined that it is unlikely that (a) market timing would be attempted by the Fund's shareholders and (b) any attempts to market time by the Fund's shareholders would result in negative impact to the Fund or its shareholders.

INVESTMENTS BY REGISTERED INVESTMENT COMPANIES

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies (and companies relying on Sections 3(c)(1) or 3(c)(7) of the 1940 Act), including shares of the Fund. However, registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive rule (Rule 12d1-4), including that any such investment company enter into an agreement with the Fund.

TAX INFORMATION

The following is a summary of certain U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have tax implications. Please consult your tax advisor about the tax consequences of an investment in Fund shares, including the possible application of U.S. federal estate and gift tax and foreign, state, and local tax laws, in light of your unique circumstances. Additional tax information is contained in the SAI, which is incorporated herein and made a part of this Prospectus.

The Fund intends to qualify each year for treatment as a RIC. To qualify as a RIC, the Fund must meet a number of requirements, including requirements as to the source of its income and the diversification of its assets. If the Fund meets those requirements, as well as certain minimum distribution requirements, the Fund will not be subject to U.S. federal income tax on income and gains from investments that are timely distributed to shareholders. If the Fund fails to qualify as a RIC or to meet minimum distribution requirements (and assuming certain relief provisions were not available), the Fund would be subject to U.S. federal income tax on income derived by the Fund at corporate rates.

If the Fund fails to qualify as a RIC or fails to satisfy the distribution requirement for any taxable year and certain reasonable cause and de minimis exceptions are inapplicable, the Fund will be subject to U.S. federal income tax at corporate rates on its taxable income (even if such income were distributed to its shareholders). In such a case, all distributions of the Fund's earnings and profits will be taxed to you as dividend income, which, in general and subject to limitations under the Code, will constitute qualified dividend income in the case of individual shareholders and would be eligible for the dividends received deduction in the case of a corporate shareholder. In such event, in order to re-qualify for taxation as a RIC, the Fund might be required to recognize unrealized gains, pay substantial taxes and interest and make certain distributions. This would cause investors to incur higher tax liabilities that they otherwise would have incurred and would have a negative impact on Fund returns. In such event, the Board may determine to reorganize or close the Fund or materially change the Fund's investment objective and strategies.

Subject to the discussion below in "Tax Information about Investments in Commodities and the Subsidiary," the Fund intends to treat any income it may derive from the Subsidiary as "qualifying income" for RIC source-of-income purposes. The remainder of this summary assumes that the Fund will qualify as a RIC and meet the minimum distribution requirements.

Unless you make your investment in shares through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences of the Fund making distributions or you selling shares. If you hold your investment in shares through a tax-exempt entity or tax-deferred retirement account, you should consult your own tax adviser to determine the tax consequences to you of an investment in the Fund's shares.

Taxes on Dividends and Distributions

For U.S. federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income to the extent of the Fund's current and accumulated earnings and profits. Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated such gains, rather than how long you owned your Fund shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of realized net long-term capital gain over realized net short-term capital loss) that are properly reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable to the Fund's Shareholders as long-term capital gains. For noncorporate shareholders, long-term capital gains are generally subject to tax at reduced rates. Distributions of short-term capital gain will be taxable to the Fund's shareholders as

ordinary income. Distributions of investment income properly reported by the Fund as “qualified dividend income” are generally taxed to noncorporate shareholders at rates applicable to long-term capital gains, provided holding periods and other requirements are met by the Fund and by you. Distributions in excess of the Fund’s current and accumulated earnings and profits will first be treated as a non-taxable return of capital to the extent of a shareholder’s adjusted tax basis in the shares, and thereafter, as gain from the sale of shares. A shareholder’s adjusted tax basis in its shares will be reduced (but not below zero) by the amount of any distribution treated as a non-taxable return of capital.

In general, distributions are subject to U.S. federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the price you paid for your shares).

Distributions (other than Capital Gain Dividends or dividends properly reported by us as interest-related dividends or short-term capital gain dividends) paid to individual shareholders that are neither citizens nor residents of the United States or to non-U.S. entities (excluding pass-through entities or arrangements) will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies.

The Fund (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally is required to backup withhold and remit to the U.S. Department of the Treasury a percentage of the distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct U.S. taxpayer identification number, who was notified by the IRS that such shareholder has under-reported dividend or interest income, or who fails to certify that such shareholder is not subject to such withholding.

Taxes When Fund Shares are Sold

Any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than one year. Any capital gain or loss realized upon a sale of Fund shares held for one year or less is generally treated as a short-term gain or loss, except that any capital loss on a sale of shares held for six months or less is treated as a long-term capital loss to the extent that Capital Gain Dividends were paid with respect to such shares. The ability to deduct capital losses may be limited depending on your circumstances.

Tax Information about Investments in Commodities and the Subsidiary

Income from commodities is generally not qualifying income for purposes of the RIC source-of-income requirements, and the IRS issued a revenue ruling indicating that certain direct investments in commodity-linked derivatives would not produce qualifying income for purposes of the RIC source-of-income requirements. The IRS subsequently issued a revenue ruling and several private letter rulings in which it concluded that certain commodity-linked notes and other commodity-linked derivatives qualifying as securities and certain investments in foreign subsidiaries holding commodity-linked derivatives would produce qualifying income for purposes of satisfying the RIC source-of-income requirements. As discussed above, the Fund intends to gain exposure to the commodities market primarily through its investment in the Subsidiary. The Fund expects that the Subsidiary will be treated as a CFC, and that the Fund will be required to include certain income of the Subsidiary in its taxable income each taxable year regardless of whether or not the Subsidiary distributes such income. The Code provides that the income inclusion from a CFC will be treated as qualifying income for purposes of the RIC source-of-income requirements if the CFC distributes such income in the same taxable year that such income is includable in the RIC’s taxable income. The IRS and the U.S. Department of the Treasury issued final regulations consistent with the private letter rulings discussed above, concluding that even if a CFC does not make a current distribution of its income, the income inclusion from a CFC will nonetheless be treated as qualifying income for purposes of the RIC source-of-income requirements as long as it was derived with respect to the RIC’s business of investing in stock, securities, or currencies. As a result, the Fund anticipates that its income inclusion from the Subsidiary will be treated as qualifying income for purposes of the RIC source-of-income requirements. This tax treatment may be adversely affected by additional changes in legislation, regulations, or other legally binding authority. If, as a result of any such adverse action, the income of the Fund from the Subsidiary was treated as non-qualifying income, the Fund might fail to qualify as a RIC, in which case, it would be subject to U.S. federal income tax at the Fund level. Should the IRS issue guidance (which could be applied to the Fund retroactively) or Congress enact legislation that adversely affects the tax treatment of the Fund’s investment in the Subsidiary, it could, among other consequences, limit the Fund’s ability to pursue its investment strategy or cause the Fund to fail to qualify as a RIC.

In addition, to maintain its qualification as a RIC, the Fund intends to limit its investment in the Subsidiary so that it does not constitute more than 25% of its total assets as of the end of any quarter. The Fund also intends to limit its investments in other commodity-linked derivatives in an effort to maintain its qualification as a RIC.

Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary are organized or incorporated, respectively, could result in the inability of the Fund or the Subsidiary to operate as described in this Prospectus and could negatively affect the Fund or its shareholders. For example, Cayman Islands law does not currently impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands governmental authority taxes, the Fund's shareholders would likely suffer decreased investment returns. There remains a risk that the tax treatment of derivative instruments, such as commodity-linked notes, commodity options, futures, and options on futures, may be affected by future regulatory or legislative changes that could affect the character, timing and/or amount of the Fund's taxable income or gains and distributions.

The Government of the Cayman Islands will not, under existing legislation, impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax upon the Subsidiary or its shareholder(s). The Cayman Islands are not party to a double tax treaty with any country that is applicable to any payments made to or by the Subsidiary.

Additional Medicare Tax

Dividends and distributions from the Fund and capital gain on the sale of Fund shares are generally taken into account in determining a shareholder's "net investment income" for purposes of the 3.8% Medicare contribution tax applicable to certain individuals, estates, and trusts.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant that exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between (i) the sum of the fair market value of the Creation Units at the time of the exchange and any amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the Authorized Participant's aggregate adjusted tax basis in the securities surrendered and any amount of cash paid. An Authorized Participant who redeems Creation Units will generally recognize a gain or loss equal to the difference between (i) the sum of the aggregate U.S. dollar market value of the securities plus the amount of any cash received for such Creation Units and (ii) the Authorized Participant's adjusted tax basis in the Creation Units. The IRS, however, may assert that a loss that is realized by an Authorized Participant upon an exchange of securities for shares cannot be currently deducted under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax adviser with respect to the tax treatment of any creation or redemption transaction.

ADDITIONAL NOTICES

Shares of the Fund are not sponsored, endorsed, or promoted by NYSE Arca. NYSE Arca has no obligation or liability to owners of the Fund's shares in connection with the administration, marketing, or trading of Fund shares. NYSE Arca is not responsible for and has not participated in the determination or calculation of the equation by which Fund shares are redeemable.

The Adviser and the Fund make no representation or warranty, express or implied, to the owners of Fund shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

FINANCIAL HIGHLIGHTS

The Fund is newly organized and therefore has not yet had any operations as of the date of this Prospectus.

**USCF ADVISERS LLC
USCF ETF TRUST
PRIVACY POLICY**

*Effective Date: January 1, 2020
Last Updated: September 16, 2021*

Introduction

This document sets forth the Privacy Policy of USCF Advisers LLC (the “Company”), and the USCF ETF Trust (the “Trust”), and each series of the Trust (individually, a “Fund” and together, the “Funds”) relating to the collection, maintenance and use of nonpublic personal information about the Funds’ investors, as required under federal legislation. The Company is an investment adviser registered with the Securities and Exchange Commission and a commodity pool operator registered with the Commodity Futures Trading Commission. This privacy policy applies to the nonpublic personal information of Fund investors who are individuals and who obtain financial products or services primarily for personal, family or household purposes.

Collection of Investor Information

In the course of doing business with Fund shareholders, the Company and the Trust may collect or have access to nonpublic personal information about Fund shareholders. “Nonpublic personal information” is personally identifiable financial information about Fund shareholders. For example, it includes Fund shareholders’ social security numbers, account balances, bank account information and investors’ holdings and transactions in shares of the Funds.

The Company and the Trust may collect this information from the following sources:

- Information about shareholder transactions with us and our service providers, or others;
- Information we receive from consumer reporting agencies (including credit bureaus); and
- Information we may receive from shareholders.

Disclosure of Nonpublic Personal Information

The Company and the Trust do not sell or rent investor information of the Funds. The Company and the Trust only disclose nonpublic personal information collected about Fund investors as permitted by law. For example, the Company and the Trust may disclose nonpublic personal information about Fund investors:

- To companies that act as service providers in connection with the administration and servicing of the Funds, which may include attorneys, accountants, auditors and other professionals; maintain shareholder accounts, and in connection with the servicing or processing of transactions of the Trust or the Funds;
- To government entities, in response to subpoenas, court orders, judicial process or to comply with laws or regulations;
- To protect against fraud, unauthorized transactions (such as money laundering), claims or other liabilities, or to collect unpaid debts; and
- When shareholders direct us to do so or consent to the disclosure, including authorization to disclose such information to persons acting in a fiduciary or representative capacity on behalf of the investor.

Fund investors have no right to opt out of the disclosure by the Company or the Trust of non-public personal information under the circumstances described above.

Protection of Investor Information

The Company and the Trust hold Fund investor information in the strictest confidence. Accordingly, the Company’s policy is to require that all employees, financial professionals and companies providing services on its behalf keep client information confidential. In addition, access to nonpublic personal information about shareholders is limited to our employees and in some cases to third parties (for example, the service providers described above) as permitted by law.

The Company and the Trust maintain safeguards that comply with federal standards to protect Fund investor information. The Company restricts access to the personal and account information of investors to those employees who need to know that information in the course of their job responsibilities. Third parties with whom the Company and the Trust share Fund investor information must agree to follow appropriate standards of security and confidentiality, which includes safeguarding such information physically, electronically and procedurally.

The privacy policy of the Company and the Trust applies to both current and former Fund investors. The Company and the Trust will only disclose nonpublic personal information about a former Fund investor to the same extent as for a current Fund investor.

Your California Privacy Rights

If you are a California resident, California law provides you with specific rights regarding your personal information, including the right to request that we disclose certain information to you about the collection and use of your personal information over the past 12 months; the right to request that we delete any of your personal information that we have collected from you, subject to certain exceptions; and the right to opt-out of the “sale” of your personal information, as defined by California law. To make such a request, contact us at 1-800-920-0259 or www.usecfinvestments.com. Please note that we are only required to respond to two such requests per customer each year.

You also have the right not to be discriminated against if you exercise any of your rights under California privacy law.

The Company may have collected the following categories of personal information of California residents in the past 12 months:

- Identifiers such as a name, Internet Protocol address, email address, or other similar identifiers.
- Categories of personal information described in subdivision (e) of California Civil Code Section 1798.80.
- Commercial information, including records of sales or purchases.
- Internet or other electronic network activity information.
- Geolocation data.
- Professional or employment-related information.

Please note that these rights do not apply to personal information collected, processed, sold, or disclosed pursuant to the federal Gramm-Leach-Bliley Act and implementing regulations. Please review the privacy notices in the Appendix below for more information about how we collect, process, sell, and disclose personal information pursuant to these laws and regulations.

This information is collected and used for the purposes disclosed in this Privacy Policy. The Company has not sold personal information of California residents in the past 12 months. The Company may have disclosed any of the above categories of personal information pursuant to an individual’s consent or under a written contract with a service provider for a business purpose in the past 12 months.

Changes to Privacy Policy

The Company and the Trust may modify or amend this privacy policy from time to time. The Company will indicate the date when it was most recently updated and its effective date. If there are changes to the privacy policy in the future, a revised privacy policy with those changes will be communicated through an appropriate channel to Fund investors as long as they continue to be Fund investors.
